REPORTS

Chairperson

Betty Kagan:
Nothing to report.

Audit Committee

David Sentnor & Stephen Keyser:
The audit is underway and close to completion. Field work is complete.
The status of the audit will be known before the January meeting.

Pension Board

Betty Kagan:
Ted will inform the committee of any updates at the next meeting.

City Council

Joe Martinich:
The City Council approved the Olia Village project and is beginning to consider incentives.
The Ballas/Olive project has been sent to P&Z for approval.

Mark Perkins:
The Ballas/Olive project concerns the Creve Coeur Plaza shopping center.
The project proposes the existing structure be demolished and replaced with retail space, hotel space, and apartment space.
The project has been reviewed by P&Z, and is undergoing a traffic study.
Once the traffic study is complete, it will be presented to P&Z again.

Ellen Lawrence:

Is there green space in the project?

Mark Perkins:

Yes. There will be space for community events such as concerts and art fairs.
The site will be like a civic plaza with underground and above-ground parking.

Staff Report

Lori Obermoeller:

The city won the GFOA award for the 2022 PAFR.

The GFOA recommends including a map in the PAFR to show the location of the city.

Olia Village Incentives

Mark Perkins:

- PGAV is the consulting firm working on the planning and economic development concerning the Olia Village project.
- City maintenance costs for the 25-year period have been reviewed with consideration for inflation.
 - The cost to the city will be partially offset because the sidewalks and streetlights will be on easements and will be maintained by property owners.
 - Escrow deposits are required for all site improvements to ensure the streets and infrastructure will be laid as planned.
- Zoning has been approved, and the focus will now shift to proposed incentives. Before any incentives are approved, blight study reports must indicate significant need for the incentive(s).

The term "blight" is defined by state statute.

 - Property tax abatement (Chapter 353) - up to 25 years on a declining scale

- Projected revenues reflect a net-positive result if the tax abatement is put into effect.
- Abatement is only on *new* tax revenue. Existing buildings are not eligible.
- Emergency Districts, such as the Fire District, are exempt from tax abatement.
- Townhomes and single-family homes are not eligible for tax abatement.
 - The School District will receive the full taxes due.
 - Meetings held with the Ladue School District have confirmed that they are open to the development.
- Sales tax exemption on certain construction materials
- Transportation Development District (TDD)
- Community Improvement District (CID)
- A third-party arborist or landscape architect will be hired to monitor tree removal and tree protection issues during the development.
- Traffic studies and a cost of services study have been performed in relation to the development and do not indicate any unexpected concerns.
 - The Lindbergh/Olive interchange was originally designed for more traffic than is currently typical.
 - The cost of services study has taken into consideration any expected losses due to the proposed incentives.

We can provide some materials from the City's law firm to show an overview of the incentives, how they work and their purpose.

The City has not used incentives very often; we plan to rely on the specialized professional services of PGAV to ensure our questions are answered and pitfalls are avoided.

1st Quarter Financial Report

Lori Obermoeller:

The first quarter of fiscal year 2024 goes through September 30, 2023.

Everything is on track with the budget right now.

General Fund

We budgeted a deficit of \$495 thousand since the ARPA funds are being transferred from the General fund into the Capital fund.

If this were not the case, we would be ending at a surplus.

- Revenues are about \$1.5M less than last year.
 - This difference is attributed to our receiving \$1.9M in ARPA funds last year.
 - Compared to last year, sales tax, utility tax, licenses and permit revenues are all up slightly.
- Expenditures are about \$213 thousand less than last year, although we did give an average of 6% pay increases on July 1st.
 - This discrepancy results from our not making a legacy pension payment that would normally be due around now.
We did not make the payment because we are closing the legacy pension plan.

Enterprise Fund

We budgeted an \$81 thousand surplus, and we are currently at a \$68 thousand surplus.

MINUTES

FINANCE COMMITTEE
CREVE COEUR GOVERNMENT CENTER
ADMINISTRATIVE CONFERENCE ROOM
300 N NEW BALLAS ROAD
CREVE COEUR, MO 63141
OCTOBER 31, 2023
3:00 PM

- Revenues are about \$44 thousand more than the first quarter last year.
 - Most of these revenues are from the increase in golf activity, which has continued steadily.
- Expenditures are about \$34 thousand more than last year.
 - The difference is due to salary increases, property tax increases, and a timing issue resulting from our change to a bi-weekly pay schedule.

Capital Fund

- Revenues are stable and about the same as last year.
- Expenditures are \$1.4M higher.
 - The increase is due to the concrete program that is normally bid out in the Fall.
 - The bids we received were not desirable. As a result, a new invitation to bid was issued and the project has been delayed until the beginning of this fiscal year.
 - The budget was adjusted accordingly for this change.

Park & Stormwater

- Revenues are in line with last year.
- Expenditures are about \$354 thousand higher than last year.
 - The increase is due to the Millennium Park project starting in September.

There is no activity to report on the Sewer Lateral or Public Safety funds.

Ted Armstrong (on behalf of Betty Kagan):
Nothing to report.

Audit Committee

Stephen Keyser & David Sentnor:

- The FY2023 audit went well and everything is complete.

Pension Board

Ted Armstrong:

- The Pension Board voted last week to disband as of March 1, 2024.
- The transfer of the legacy pension plan to Lagers is complete.

City Council

Joe Martinich:

- The City Council is developing incentives for Olia Village.
- Stormwater program studies are complete and projects have been ranked. Designs may be ready in the next few months. Work is expected to begin in Fall of this year or Spring of next year.
- The Parks redevelopment project is moving along nicely.
- The New Ballas sidewalk project has begun.
- The City Council voted on a conservative pay raise for the Mayor and City Council. This is their first raise in 15 years.

UNFINISHED BUSINESS

NEW BUSINESS

2nd Quarter Financial Report

Lori Obermoeller:

The second quarter financial report goes through December 31, 2023.

General Fund:

We budgeted a deficit of \$495,000 to reflect the planned transfer of ARPA funds from the General Fund to the Capital Fund.

Without this, we would have a surplus. We are on track with those projections.

- Revenues are \$1 million less than last year due to the City receiving a \$1.8 million ARPA grant last year.
- Revenues are actually up about \$800,000.
 - Sales taxes are up by around \$71,000.
 - Utility taxes are up by around \$242,000.
 - Building permits are up by around \$157,000.
 - Interest Revenue is up.
- Expenditures are up about \$68,000 more than last year.
 - The City gave a 6% average pay increase to all employees in July.
 - The pension payout was delayed due to the conversion of the legacy plan to Lagers.
The pension payout occurred in January and will be reflected in the 3rd quarter financial report.

Enterprise Fund

We budgeted a surplus of \$71,000, and we're currently at a surplus of \$37,000.

MINUTES
CITY OF CREVE COEUR
FINANCE COMMITTEE
CREVE COEUR GOVERNMENT CENTER
ADMINISTRATIVE CONFERENCE ROOM
300 N NEW BALLAS ROAD
CREVE COEUR, MO 63141
JANUARY 30, 2024
4:00 PM

- Revenues are about \$103,000 more than last year due to Golf and Ice both doing well.
- Expenditures are about \$69,000 more than last year.
 - This is partially due to the previously mentioned pay increase.
 - There is an extra pay period in 2024 after switching to a biweekly payroll schedule.
 - There was an increase in property taxes.

Capital Fund

The fund is on budget.

- Revenues are about \$167,000 higher than last year.
 - We received a \$56,000 grant from MODot for the design services for the Lindbergh/Old Olive project.
 - We received a \$45,000 refund for the Olive/Lindbergh Bridge.
- Expenditures are \$433,000 higher than last year.
 - This is mainly because the concrete bid held last year was too high. This was delayed until the Fall and is reflected in the 2024 budget.
 - The purchase of a dump truck and the fuel system was also delayed until 2024.

Park and Stormwater Fund

The fund is doing really well.

- Revenues are up mostly due to sales tax and interest revenue.
- Expenditures are \$923,000 higher than last year due to the progression of the planned park and stormwater projects.
 - Millenium Park
 - Watershed Management (complete)
 - Alden Lane Stormwater (complete)

FINANCE COMMITTEE
CREVE COEUR GOVERNMENT CENTER
ADMINISTRATIVE CONFERENCE ROOM
300 N NEW BALLAS ROAD
CREVE COEUR, MO 63141
JANUARY 30, 2024
4:00 PM

Public Safety Fund

- Revenues are up due to sales tax and interest revenues.
- Expenditures are about \$171,000 less than year.
 - This is due to the previously mentioned pension payout delay.
That expenditure will be reflected in the 3rd quarter financial report.

Overall, the City is doing very well.

Review of Financial Policies

Lori Obermoeller:

We have an update to our purchasing policy to incorporate Design Build.

Purchasing Policy Update for Design Build Project

Steven Berecz:

Design Build eliminates some of the time and cost required to complete development projects by allowing the City to consolidate the design and construction request for bid procedures into one, with the winner being awarded both jobs under one contract.

Design Build was presented to City Council, and they were in favor.

Design Build is ideal in situations where the scope of a project is well-defined and somewhat limited.

We are looking at a possible Design Build project for the Venable Park tennis courts.

The Finance Committee has recommended that part of the evaluation process when choosing a winning bidder include the City request references from other entities that use Design Build.

DRAFT

CAPITAL IMPROVEMENT PROGRAM

FISCAL YEARS 2025-2029

CAPITAL FUND

PARKS AND STORMWATER FUND

BUILDING PROJECT BOND FUND

DRAFT – FEBRUARY 23, 2024

Revised Draft March 11, 2024

Adopted by the City Council of the City of Creve Coeur through Resolution xxxx on April xx, 2024.

This page has been intentionally left blank.

EXECUTIVE SUMMARY

The Capital Improvement Program (CIP) is the City's long-range plan for improvements to infrastructure, parks, and other community facilities. The CIP is a tool to assess the long-term capital needs, values, and desires of the City and to establish funding of high-priority projects in a timely and cost-effective manner. This plan is a living document and is subject to amendment by the City Council.

The CIP is intended to ensure that policy makers are responsible to the Creve Coeur community with respect to the expenditure of City funds for capital improvements.

CIP Goals

The following are goals of the CIP:

- Provide a plan for the improvement or replacement of deteriorating infrastructure
- Improve operational or functional aspects of existing infrastructure
- Add new facilities and improve the community's infrastructure to enhance the quality of life in Creve Coeur
- Provide for the planned replacement of major equipment required for the City's operations

CIP Criteria

To be considered a capital improvement, projects or equipment must have a useful life of at least five years and have a minimum cost of \$20,000.

A special set of criteria has been identified to assist in assessing and prioritizing CIP projects. Proposed projects reflect the goals of the Comprehensive Plan through their demonstration of these criteria:

- *Availability of Outside Funding*: higher priority is given to projects that are eligible for and are likely to be considered for grant funding or shared-cost programs, which would reduce the City's investment.
- *Beautification*: aesthetic improvements to natural habitats or frequently traveled or visited areas within the City for public enjoyment, such as the use of public art on public lands
- *Community Demand*: projects that have received a level of demonstrated resident support or demand, including support of City departments, boards, committees, and commissions.
- *Condition of Existing Facility*: improvements that replace or maintain the City's infrastructure, facilities, or equipment so that it remains in a serviceable, safe, and efficient condition.
- *Coordination (projects, regulations, City-adopted plans)*: projects that fit within planned coordination between multiple projects or agencies to reduce costs or minimize disruption to services, meet state or federal law requirements, or projects that are identified in other City-adopted plans.
- *Economic Growth*: projects focused on maintaining housing values and attracting businesses, residents, or visitors to the City. Projects supporting private development must include return on investment ratios or a fully documented cost/benefit analysis.
- *Operating Efficiency*: equipment or facilities improvements to streamline work processes or benefit from technological advancements. Projects that reduce the cost of operations will receive priority, but those that will increase the cost of operations must identify trade-offs to support those additional costs.
- *Protection & Conservation*: improvements to the City's park system or historical landmarks that allow these facilities to be enjoyed by future generations or projects that reduce the City's environmental impact.
- *Public Safety*: improvements that focus on preserving and protecting the general public from harm and reducing the City's risk exposure.

Relationship between the CIP and the Creve Coeur 2030 Comprehensive Plan

According to the Creve Coeur 2030 Comprehensive Plan:

Within the Creve Coeur 2030 Comprehensive Plan Update, many projects are identified or implied, as specific projects or as conceptual ideas. These projects and others, resulting from recommendations of the Comprehensive Plan, should be developed and incorporated in the City's annual CIP review process. Further detail and refinement of identified and conceptual projects, facilities, or infrastructure improvement needs will be required as the implementation of the Comprehensive Plan occurs.

Development and Adoption of the CIP

According to the City Charter, a draft of the five-year CIP shall be proposed by the City Administrator to the City Council no later than the second regular meeting in February of each year. Prior to the submittal of the draft CIP to the City Council, public input is obtained through the City newsletter, website, and the City's boards, committees, and commissions.

Prior to the City Council's adoption of the CIP, and as required by City Charter, the CIP is submitted to the Finance Committee for recommendations and comments. The Planning & Zoning Commission also reviews the plan emphasizing the location, extent, and character of the proposed projects prior to City Council review, approval, and adoption. A public hearing is held each spring (typically in April) by the City Council to review the final draft of the CIP in March or April, prior to adoption.

The CIP includes a description of each proposed project and equipment with details regarding justification, cost estimate, operating and maintenance budget impact, and funding sources.

Funds in the CIP

There will be three funds that contribute to the FY2025-FY2029 CIP. These funds are:

1. Capital Fund. This fund is financed by a half-cent capital improvement sales tax, which is supplemented by annual transfers from the General Fund and project-specific grants.
 - Total Capital Fund revenues: \$22.4 million
 - Total Capital Fund expenditures: \$21.6 million
2. Parks and Stormwater Fund. In November 2020, voters in Creve Coeur approved a half-cent sales tax that is dedicated to finance operations, maintenance, and capital improvements for the City's parks and stormwater infrastructure. This fund will be supplemented by grants and other outside funding related to parks and stormwater.
 - Total Parks-Stormwater Tax Fund revenues: \$17.0 million
 - Total Parks-Stormwater Tax Fund expenditures: \$18.1 million
3. Building Project Bond Fund. In November 2016, voters in Creve Coeur approved a bond measure to build a new police station and to make security and accessibility improvements to the Creve Coeur Government Center. The police station was completed in 2020, so the majority of this fund's project-related expenses is complete. Most of the activity in the FY2025-FY2029 CIP is related to the fund's debt service.
 - Total Building Project Bond Fund revenues: \$5.4 million
 - Total Building Project Bond Fund expenditures: \$3.7 million

Combined, these three funds have a projected revenue of \$44.8 million and projected expenditures of \$43.4 million for the FY2025-FY2029 CIP. The charts below break down these revenues and expenditures into the general categories that are found in the CIP.

Revenues All Funds FY2025-FY2029

Expenditures All Funds FY2025-FY2029

More detail is provided for each of the three funds in the sections that follow. Each fund is briefly described, and the revenues and expenses for each fund are summarized for the duration of the FY2025-FY2029 CIP. Project-specific summaries and financial projections are included for each line item that appears in the five-year CIP. Projects that are expected to be completed in FY2024 are not included in this report.

Appendix

This report is one of several documents that forms the CIP. Appendices to this report include:

- Appendix A: FY2025-FY2029 CIP Spreadsheets
- Appendix B: FY2020-FY2029 CIP 10-Year Summary
- Appendix C: Community Comments and Requests

The latest version of these documents can be found on the City's website at:

<http://www.creve-coeur.org/95/Capital-Improvement-Program>

Questions and Comments

If you have any questions or comments about the CIP, please contact Mark Perkins, City Administrator, at mperkins@crevecoeurmo.gov or (314) 872-2511.

CAPITAL FUND

The City's Capital Fund has served as the primary mechanism for funding capital projects in the CIP for many years. The Capital Fund finances investments into the City's government facilities, parks and recreational facilities, stormwater infrastructure, streets and sidewalks, capital equipment, and project administration.

Capital Fund Revenues

The City's Capital Fund has three main funding sources: a half-cent capital improvement sales tax, grants and other outside funding, and transfers from the General Fund. Together, these funding sources are projected to generate \$22.9 million over the FY2025-FY2029 CIP.

Half-Cent Capital Improvement Sales Tax. Projected sales tax revenues are approximately \$11.84 million for the FY2025-FY2029 CIP, which averages out to approximately \$2.37 million per year in the plan.

Sales tax revenue projections have improved significantly since the uncertainty and economic downturn associated with the COVID-19 pandemic forced the City to reduce its revenue estimates. Sales tax projections in the FY2025-FY2029 CIP include an estimated 1% increase each year, which will return the sales tax revenues to the FY2020 level by FY2025.

Grants and Outside Funding. Federal grants for roadway projects and accessibility improvements will provide approximately \$6.61 million over the FY2025-FY2029 CIP.

Staff will seek additional grant funding during for this period, but applications for that funding are either in the evaluation process or not yet available. For projects that anticipate grant funding that has not yet been awarded, the City's matching funds are shown as the project costs in the fiscal years when

the phases of the project are planned to occur. The full cost of the project and the associated grant funding will be programmed into the CIP upon notification of award of the grant.

Transfers from the General Fund. The total transfer from the General Fund to the Capital Fund over the proposed FY2025-FY2029 CIP is \$3.4 million.

A transfer from the General Fund to the Capital Fund is proposed for each fiscal year in the proposed CIP. Annual General Fund transfers to the Capital Fund have been increased from \$400,000 to \$500,000, based on the transportation-oriented revenue sources of the General Fund which include the County road and bridge tax revenues. FY2028 also includes an additional transfer of \$900,000 to be used for the roofing improvements to the Ice Arena and the Public Works Service Center.

Capital Fund Expenditures

Capital expenditures from the Capital Fund are projected to be approximately \$21.6 million over the proposed FY2025-FY2029 CIP, with a maximum annual expense of \$6.8 million in FY2026. Details about these expenditures can be found in the project summary sheets that follow.

FY2025-FY2029 CAPITAL FUND REVENUES

FY2025-FY2029 CAPITAL FUND EXPENDITURES

GOVERNMENT CENTER RENOVATIONS

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$113,128	\$30,000	\$30,000	\$30,000	\$30,000	\$30,000	\$0

Project Description:

Proposed projects in FY2025 will focus on needed repairs and renovations that will make the Government Center more inviting to residence and staff. Project will likely include improvements to the Multipurpose Room (such as new flooring); painting offices and common areas; and updating lighting to be more energy efficient with the help of an Ameren grant.

Existing Conditions:

The Creve Coeur Government Center has inadequate space for staff, meetings, archives, and storage. Renovations are also needed to make the Government Center more accommodating, helpful, and useful for both residents and staff. For example, the former Police Department and other areas of the Government Center will require extensive renovations before departments can be moved to more accessible locations.

Justification: *Operating Efficiency; Condition of Existing Facility*

The proposed projects for FY2025 will include continued lighting efficiencies that will help to lower energy cost and provide a well lite environment for various meetings and work areas. Construction of a training room that can also be used as a conference room, to provide improve learning and working conditions for staff.

Operating Budget Impact:

The proposed renovations will improve energy efficiency and replace aging systems that need frequent and costly maintenance.

ROOFING FOR THE PUBLIC WORKS GARAGE

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$500,000	\$0	\$0	\$0	\$0

Project Description:

The Public Works garage roof was damaged during a hailstorm, and an infrared roof moisture inspection showed that water is leaking under the roof's waterproof membrane. This project proposes a tear-off and replacement of the roof. Project costs may be covered by insurance.

Existing Conditions:

The existing roof was damaged by hail. Inspections show that the roof is leaking.

Justification: *Operating Efficiency; Condition of Existing Facility*

The Public Works garage houses Public Works equipment and is where City-owned equipment is repaired and maintained. This structure is vital in keeping the Public Works fleet in good working order. Replacing the roof now will keep City-owned equipment from water damage and possibly prevent roof leaks from causing more damage in the future that may be even more costly to repair.

Operating Budget Impact:

Replacing the roof now will keep City-owned equipment from water damage and possibly prevent roof leaks from causing more damage in the future that may be even more costly to repair.

EV CHARGING STATIONS AT THE POLICE DEPARTMENT AND GOVERNMENT CENTER

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$100,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The automotive market is rapidly moving towards electric vehicles (EVs). An August 8, 2022 article in *Car and Driver* states that EV registration increased by 60 percent in the first quarter of 2022 while overall new car registration dropped by 18 percent. IHS Markit estimates that by 2035, 45 to 50 percent of all passenger car sales will be EVs. Similarly, Police Departments are increasingly seeking to add EVs to fleets. Installing EV charging stations at the Police Department and Government Center would be the City's first step towards accommodating residents' changing vehicle preferences and adapting to market trends. The charging ports at the Government Center would be available for residents to use (for a fee) and, in the future, used to charge Public Works fleet EVs. The stations at the Police Department would allow the Police force to take advantage of fast accelerating vehicles that will also reduce fuel costs.

This project is eligible for rebates under an Ameren Missouri program that covers up to half the cost of EV charging station equipment and installation. Currently the Ameren Missouri program grant only covers public facing EV charging stations. Therefore, it is anticipated that EV charging station(s) at the Police Department would be installed at a later date, but the electrical underground infrastructure would be installed as part of the Government Center project.

Existing Conditions:

The City does not have public EV charging stations or stations available for City-owned fleet vehicles. Before the City can add EVs to the Police Department and Public Works fleets, EV changers need to be installed.

Justification: *Availability of Outside Funding, Coordination, Operating Efficiency, Protection & Conservation*
EVs offer many benefits including:

- Savings on fuel costs as compared to gas-powered vehicles. Savings increase when vehicles are charged during off-peak hours.
- With fewer moving parts, electric motors have lower maintenance needs, and the cost of ownership of EVs is often less than the total cost of ownership of gas-powered vehicles.
- Quick acceleration, an important performance measure for Police Department vehicles.
- Zero tailpipe (green house gases) emissions.

Operating Budget Impact:

As more EVs are added to City fleets, maintenance and fuel costs should decrease.

Comments:

None

PUBLIC WORKS GARAGE PARKING LOT REPAIRS

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$75,000	\$0	\$0	\$0	\$0	\$0

Project Description:

Sections of the Public Works Garage parking lot were installed many years ago and have experienced a high volume of traffic due to the nature of the operations required. The project proposes to repair failing asphalt and concrete sections of the parking lot to allow for the safe operation of equipment and vehicles.

Existing Conditions:

The parking lot has excessive potholing and cracking of the original asphalt and concrete pavements at numerous locations which will be rehabilitated as part of this project.

Justification: *Condition of Existing Facility & Operating Efficiency*

The Public Works garage houses Public Works equipment and is where City-owned equipment is repaired and maintained. The parking lot is vital in keeping the Public Works fleet on the streets to serve the community. Repairing the lot now will keep City-owned equipment from damage and possibly prevent further damage to the base layer of the lot in the future that may be even more costly to repair.

Operating Budget Impact:

Repairing the lot now will keep City-owned equipment from damage and possibly prevent further damage to the base layer of the lot in the future that may be even more costly to repair.

PUBLIC WORKS SETTLEMENT STUDY

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$35,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The Public Works building has experienced differential settlement over the years. A consultant has been retained in the past to conduct settlement studies at various locations within the building. The project will have the consultant to perform detailed surveys at multiple locations throughout the building to monitor the cracks in the walls, facades and other locations. The survey will occur over an eighteen to twenty-four month timeframe. The consultant will also recommend stabilization methods as/if necessary for the building.

Existing Conditions:

The Public Works building has experienced settlement in the past mainly due to the building being constructed on a fill site. Repairs to the building have been previously made due to the settlement experienced. A settlement study has been performed previously at the Public Works building and this project will be a continuation of the previous studies.

Justification: *Protection & Conservation*

New cracks are forming in the block walls at the maintenance facility. In addition, older cracks are widening causing loose blocks to fall from the walls. Safety of workers and the building structural integrity are our concerns.

Operating Budget Impact:

None

PARK OR DIELMANN COMPLEX IMPROVEMENTS (GRANT MATCH)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$30,500	\$30,500	\$0	\$30,500	\$0	\$0

Project Description:

Funds listed in this account represent the City's anticipated matching funds for projects funded through Municipal Park Grants. To remain competitive, the City can only apply for Municipal Park Grants every other year. The FY2024 grant was used to assist with the costs for the Dielmann Recreation Complex including the refrigerant switchover and mechanical equipment replacement.

Existing Conditions:

Many aspects of the City's ice arena, golf course, and parks (including tennis courts, playgrounds, walking paths, pavilions, and other amenities) require maintenance, improvements, or replacement.

Justification: *Availability of Outside Funding; Condition of Ex. Facility; Others Depend Upon the Project*

By budgeting for the local match, a grant application can be completed without searching for available funds or making amendments to the program. Available grants may help to address any number of CIP criteria including, but not limited to, improving condition of existing facilities, operating efficiency, beautification, and protection and conservation of the park system or historical landmarks. These projects are supported by the needs assessments of the Dielmann Recreation Complex (FY2014) and Golf Course (FY2016) and the Parks and Recreation Master Plan (FY2019-FY2020).

Operating Budget Impact:

The improvements brought by these projects typically replace old or failing systems that require significant maintenance. These improvements should reduce operating costs.

Comments

The current maximum amount of funding that the City is eligible for through the Municipal Park Grant program is currently \$525,000 per project. These grants are competitive, and the City's contribution to the project affects the project application score and likelihood of a funding award. The City plans to provide a 6% grant match for its projects in order to maximize the number of points related to the City's contribution, which would make the grant match about \$30,500 for a project that receives the maximum grant funding.

PARK OR DIELMANN COMPLEX IMPROVEMENTS (GRANT MATCH) CONTINUED

Expenditure Type	Amount

ACCESSIBILITY IMPROVEMENTS (CDBG)

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0**	\$0	\$20,000	\$20,000	\$20,000	\$20,000	\$0

** Accessibility Improvements in Prior Years fell under 9501 Government Facilities.

Project Description:

The City of Creve Coeur is typically eligible for \$20,000 each year for accessibility improvements through the Community Development Block Grant (CDBG) program. In FY2026, the City will propose a project to improve accessibility at the Dielmann Recreation Center with features like automatic opening devices for doors. For the FY2027 to FY2029 grants, several other projects will be considered for grants including improved accessibility into the Dielmann Recreation Center locker/restrooms and improved access at the ice rink.

Existing Conditions:

Projects are designed to improve facilities that are out-of-compliance with the current Americans with Disabilities Act (ADA) regulations.

Justification: *Public Safety; Coordination; Availability of Outside Funding*

Each project seeks to improve ADA compliance through accessibility improvements to government facilities and along public pedestrian routes. The focus of these projects is to provide public safety and upgrade existing facilities.

Operating Budget Impact:

None. Projects that are undertaken as part of this program are relatively small in scope, and the City typically is 100% reimbursed for the project costs through the CDBG federal grant.

Comments:

The City is designating this funding with the anticipation of receiving grant funding in the amount of \$20,000 from the CDBG Commission. This annual grant is available to municipalities to address accessibility projects. Scheduling of this project is subject to a successful grant application and availability of grant funding.

Comments:

ROOFING FOR ICE ARENA (INSURANCE CLAIM)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$400,000	\$0	\$0	\$0	\$0

Project Description:

The Ice Arena's roofing was damaged during a hailstorm. This project proposes a tear-off and replacement of the roof. Project costs may be covered by insurance. The project will also require that the existing solar panels be removed and then reinstalled after the new roof is in place.

Existing Conditions:

The existing roof was damaged by hail, which has resulted in leaks at various locations in the building. Follow up inspections verified that the roof is leaking and will need to be replaced to prevent more expensive damage to the structure.

Justification: *Operating Efficiency; Condition of Existing Facility*

The Ice Arena houses expensive and sensitive equipment. A roof that is in good repair is essential to protect the investments the City has made at this facility.

Operating Budget Impact:

Replacing the roof in FY2026 will help prevent water damage that may add to future repair costs.

Comments:

None

GOLF COURSE IRRIGATION SYSTEM REPLACEMENT (MUNICIPAL PARK GRANT)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$550,000	\$0	\$0	\$0	\$0

Project Description:

The project will completely replace the existing golf course irrigation system in FY2026. The existing irrigation system is over 40 years old and has had many repairs over its life to maintain the high-quality course that is currently enjoyed by residents and visitors. The new system will be a state-of-the-art system and will allow greater flexibility in watering operations. The new system will include a new booster pump. The City intends to apply for the Municipal Park Grant to partially fund this construction project.

Existing Conditions:

The existing golf irrigation system is showing its age with numerous leaks and structural issues. These numerous issues lead to inefficient watering through areas of the course and increase water usage due to leaks. Also, the golf course maintenance staff needs to dedicate time to repair the breaks, which will be greatly reduced after installation of a new irrigation system.

Justification: *Condition of Ex. Facility; Availability of Outside Funding; Operating Efficiency*

The City will seek Municipal Park Grant Funding to supplement the cost associated with this construction project. The municipal part grant request is anticipated to be around \$500,000 along with the City's contribution for a total project cost of approximately \$1,000,000. The new state of the art system will allow golf course maintenance staff to optimize watering rates and timing throughout the entire course.

Operating Budget Impact:

The improvements brought by this project will replace an old and failing irrigation system that requires significant maintenance labor hours and material costs to keep operational. The new irrigation system will reduce operation costs related towards repairs of the irrigation system on the golf course.

Comments:

None

STREET AND SIDEWALK MAINTENANCE PROGRAM

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$3,421,233	\$1,442,000	\$1,463,900	\$1,485,900	\$1,508,200	\$1,530,800	\$0

Project Description:

The project includes concrete pavement replacement, asphalt pavement resurfacing, asphalt pavement maintenance, micro surfacing, roadway striping, and sidewalk replacement for the annual maintenance of the City's roadway and sidewalk networks.

Existing Conditions:

While the majority of the City's pavement network is in good condition, annual and on-going evaluation of pavement and sidewalk conditions find aging and failing pavement and sidewalks that need to be addressed.

Justification: *Public Safety; Condition of Existing Facility; Coordination; Community Demand*

The City's street and sidewalk network form the City's largest asset that serves all of the City's residents and visitors. Annual maintenance of streets and sidewalks is required to preserve their functionality and to limit future repair costs. The City uses a pavement management system to track pavement conditions, and the City aims to evaluate the condition of each street on a four-year rotation. The pavement condition data assists with the prioritization of pavement repairs and maintenance and helps the City preserve its existing infrastructure as efficiently as possible. Federal regulations require that sidewalks meet accessibility standards so that all users have an opportunity to travel safely. The City's sidewalk maintenance program follows the federal regulations and supports the City's Pedestrian Plan.

Operating Budget Impact:

Pavement and sidewalk maintenance programs will improve and preserve the infrastructure and will result in a reduction in the number of pothole repairs and other on-going maintenance needs.

Comments:

Approximately 10% of the annual street and sidewalk improvements is typically directed toward accessibility improvements to the City's sidewalk network in support of the accessibility transition plan. Larger projects, such as grant-funded improvements, are stand-alone projects that are described in separate project sheets.

STREET RECONSTRUCTION / REHABILITATION

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$300,000	\$0	\$300,000	\$300,000	TBD

Project Description:

The City plans to fully or substantially replace sections of failed residential roadways through this project. The various needs of the pavement network are evaluated each year to determine which streets need to be reconstructed. The City plans to replace the pavement on Conway Gardens Court in FY2024 and the reconstruction funds for FY2025 are planned to be used on Office Parkway as part of the Craig Road STP grant project. Later projects will be determined by future reviews of pavement conditions.

Existing Conditions:

Residential streets that are considered for reconstruction have reached the end of their useful lives and are generally in too poor of condition to gain long-term benefits from the City's typical pavement maintenance programs. Most of the streets that have been included in this program were older concrete streets that were overlaid with asphalt decades ago.

Justification: *Public Safety; Condition of Existing Facility; Community Demand*

All of the City's streets will eventually reach the end of their useful lives, fail at a structural level, and require reconstruction. This program provides the City with a tool to address some of its residential streets that are in poor or failing condition that typical maintenance programs can no longer improve.

Operating Budget Impact:

Streets with failing pavement typically require frequent maintenance in the form of pothole patching and emergency pavement repairs, which City staff often performs to address the issues as quickly as possible. Allocating funds for reconstruction also allows for more of the maintenance budget to be used for maintaining and preserving streets that are in better condition, which means more streets and sidewalks will be addressed, reducing the number of calls for City staff to make repairs.

Comments:

The City has invested more than \$2 million into street reconstruction projects during the past ten years

FERNVIEW SIDEWALK PROJECT**PHASE 1 – OLIVE TO GALLAGHER (DESIGN & TAP GRANT)**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$187,724	\$230,000	\$645,000	\$0	\$0	\$0	\$0

Project Description:

The City developed a concept plan to add a sidewalk along Fernview Drive (between Olive Boulevard and Gallagher Road) and along the side streets to connect with the existing sidewalk networks on each side of Fernview. The result of this project would be a unified collection of subdivision sidewalks that are currently not connected. Funding in FY2025 and FY2026 represents the City's matching funding for design, easement acquisition, and construction for a federal Transportation Alternatives Program (TAP) grant. The TAP grant application was approved and will cover 80% of the right-of-way and construction cost in FY2025 & FY2026.

Existing Conditions:

Fernview Drive is a collector roadway that serves several of the residential subdivisions in Ward 4. Sidewalks were constructed throughout most of the subdivisions to the east and west of Fernview, but not along or adjacent to Fernview itself. The result is a series of sidewalks without connections to each other or to Olive Boulevard.

Justification: *Community Demand; Public Safety; Availability of Outside Funding*

Increasing the walkability of Creve Coeur is a common request from residents and a goal outlined in the City's Strategic Plan. Creating a sidewalk along Fernview that connects to the adjacent existing sidewalks will make progress toward this goal.

Operating Budget Impact:

None

Comments:

The City's anticipated portion of a grant-funded project are included in FY2025 and FY2026.

NEW BALLAS SIDEWALK EXTENSION**PHASE 3 – (FEDERAL TAP GRANT)**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$67,037	\$10,000	\$550,000	\$0	\$0	\$0	\$0

Project Description:

This project involves relocating a retaining wall and underground utilities to accommodate a new sidewalk along the west side of North New Ballas Road between Magna Carta Drive and Rocky Drive. Constructing this sidewalk will connect two sections of sidewalk to create a continuous pedestrian path along the west side of New Ballas from Conway Road to Old Ballas Road. The City was awarded a federal grant for this project through the Transportation Alternatives Program (TAP), but a water main relocation will be required which caused the project to exceed the City's budget. In FY2024, the City reapplied and was approved for a TAP grant for this project, with funding to cover 80% of the right-of-way and construction cost in FY2025 & FY2026.

Existing Conditions:

No sidewalk currently exists at this site, but pedestrians commonly use the small grass strip nonetheless. The property's retaining wall has been a barrier to constructing a sidewalk here.

Justification: *Public Safety; Condition of Existing Facility; Availability of Outside Funding; Resident Request*

Completion of this sidewalk will provide a more suitable pedestrian route for those wishing to walk north along the west side of New Ballas Road.

Operating Budget Impact:

No significant maintenance is anticipated in the near future. The new retaining wall will be located outside of the right of way and will be maintained by the property owner.

Comments:

This project will complete the sidewalk improvements envisioned in a sidewalk concept study from 2008. The conceptual plans from that study provided the basis of the design for a portion of the Ladue Road Sidewalk Project in 2013 and for the New Ballas sidewalk improvements between Ladue Road and De Smet Jesuit High School in 2019.

Funding shown for "prior years" includes a preliminary design and preparation of easement documents that were completed to coordinate with the property owners and to prepare for the grant application.

LINDBERGH-OLD OLIVE INTERSECTION

(STATE COST-SHARE/STP GRANT)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$553,935	\$2,045,500	\$0	\$0	\$0	\$0	\$0

Project Description:

This project involves the partial reconstruction of the intersection of Lindbergh Boulevard and Old Olive Street Road to add a traffic signal that will provide full access in all directions. This signal will allow for a pedestrian/bicycle crossing across Lindbergh and will connect the two halves of Old Olive, both of which are critical steps toward implementation of the Old Olive Great Street plan and the 39 North Master Plan. The City will use federal Surface Transportation Program (STP) grant funding and State Cost-Share Program funding to finance approximately 83% of the project.

Existing Conditions:

The existing intersection of Lindbergh Boulevard and Old Olive Street Road allows only right-in, right-out access for Old Olive on both sides of Lindbergh. A concrete barrier along the Lindbergh median prohibits any east-west vehicular or pedestrian crossing of this intersection.

Justification: *Public Safety; Availability of Outside Funding; Coordination; Beautification*

The proposed improvements to this intersection are supported by the Comprehensive Plan Creve Coeur 2030, the 39 North Master Plan, and the Old Olive Street Road Great Street Plan. These improvements provide the best chance for a pedestrian or bicycle crossing of Lindbergh Boulevard in that area.

Operating Budget Impact:

The City will most likely need to take over the maintenance of Old Olive Street Road from the Missouri Department of Transportation in return for the funding for this project. The ongoing maintenance cost for Old Olive Street Road could be significant.

Comments:

Conceptual plans for this intersection were developed as part of the Old Olive Street Road great street plan, which was completed through a partnership of St. Louis County, the St. Louis Economic Development Partnership, and the City of Creve Coeur. Funding in "prior years" includes concept development and design costs in FY2019-FY2021 to prepare for the grant applications and to design the project. Additional funding for the project may be available through the Governor's Transportation and MODOT Cost Share Program.

OLIVE-LINDBERGH INTERCHANGE ENHANCEMENTS

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$302,250	\$50,000	\$0	\$0	\$0	\$0	TBD

Project Description:

The City has partnered with the St. Louis Economic Development Partnership (SLEDP) and the Missouri Department of Transportation (MoDOT) to add decorative elements to the planned reconfiguration of the interchange of Olive Boulevard at Lindbergh Boulevard. The enhancements include black powder coat and illuminated street name signs to two new traffic signals on Olive and decorative median, pedestrian-scale lighting, and bridge treatments along Olive over Lindbergh. The project is managed by SLEDP and was completed in spring 2022. The funding identified in FY2025 is for the design of landscaping for the Olive-Lindbergh interchange.

Existing Conditions:

The existing cloverleaf interchange is outdated and was reconfigured to a more compact, pedestrian-friendly design. In FY2025, the design plans for landscaping will be done. The City will hire a consultant to complete the required engineering design.

Justification: *Coordination; Condition of Existing Facility; Beautification*

The Olive-Lindbergh interchange serves as one of the main entry points to the City and is located in the middle of the emerging 39 North District. Visual improvements in this area promote the City and encourage growth.

Operating Budget Impact:

The City will be responsible to maintain the signal and bridge enhancements and landscaping. The costs associated with the bridge and signal enhancements is expected to be minimal for the foreseeable future. Landscape maintenance costs could be limited if native grasses and other low-maintenance plants are used in the landscaping design and will be evaluated during landscaping design and selection.

Comments:

The cost to construct the landscaping at this interchange will not be known until the design is complete.

OLIVE MEDIAN ENHANCEMENT STOCK

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$59,841	\$20,000	\$20,000	\$20,000	\$20,000	\$20,000	\$0

Project Description:

The median on Olive Boulevard has concrete, decorative planters. If the planters are hit during a traffic accident, often the entire median planter needs to be replaced. The construction and delivery for concrete planters takes months. Rather than wait months at a time for replacement planters, the City maintains a supply. Additionally, the City pays a lower cost per unit by buying several planters at one time. The cost of the planters is reimbursed later through insurance.

Existing Conditions:

Olive Boulevard is one of the City's busiest streets, and median enhancements with well-maintained vegetation can have a traffic calming effect while promoting the City as a place that takes pride in making public-facing spaces aesthetically pleasing.

Justification: *Condition of Existing Facility; Operating Efficiency; Beautification*

In most years, the concrete decorative planters have needed to be replaced several times. By buying ahead and in bulk, the City pays less per unit and has planters ready to be installed when needed.

Operating Budget Impact:

The cost per unit is lower when the City buys median enhancements in bulk.

CRAIG ROAD IMPROVEMENTS (STP GRANT)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$179,800	\$1,400,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The project involves improvements to the intersection layout, resurfacing pavement, and reconstructing and expanding sidewalks along Craig Road and Olde Cabin Road between Old Ballas Road and Office Parkway. The City has been awarded a federal Surface Transportation Program (STP) grant for this project. The grant will reimburse the City for approximately 60% of the total cost of the project.

Existing Conditions:

The pavement of Craig Road is currently in fair condition, but sections of the pavement have failed. The traffic flow along Craig is hampered by non-standard intersections with Olde Cabin Road and Office Parkway, and the sidewalks along Craig Road are generally inadequate and have poor accessibility at the intersections.

Justification: *Public Safety; Condition of Existing Facility; Availability of Outside Funding; Resident Request*

Portions of Craig Road are in poor condition, and the City has provided increasing attention to pavement repairs and pothole patching. Improvements to the intersections along Craig Road are recommended to improve traffic flow and safety and to provide safe and accessible sidewalk crossings at these intersections.

Operating Budget Impact:

The pavement and sidewalks of Craig Road are in increasing need of maintenance. Roadway resurfacing and sidewalk reconstruction will reduce future maintenance costs.

Comments:

Funding in "Prior Years" was for a conceptual design plan for this project, which the City used to evaluate its options and to support its application for grant funding.

NEW BALLAS IMPROVEMENTS**PHASE 2 – S NEW BALLAS (DESIGN AND STP GRANT)**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$150,000	\$50,000	\$1,275,000	\$0	\$0	\$0	\$0

Project Description:

The project includes pavement resurfacing, concrete curb and sidewalk replacement, and accessibility improvements along New Ballas Road from Conway Road to Ladue Road. The project will also include a pedestrian connection to the bus stop near Mercy Hospital along the east side of New Ballas. The City has been awarded a federal Surface Transportation Program (STP) grant for this project. The grant will reimburse the City for 80% of the right-of-way and construction costs in FY2025 & FY2026.

Existing Conditions:

The asphalt pavement is generally in good condition, but many of the concrete sidewalks, curbs, and entrances are in poor condition. Although areas of the sidewalk and curbing were replaced in FY2019, areas still fall short of the current accessibility standards. South New Ballas Road was found to have an average pavement condition index (PCI) of 47 in 2023, which indicates that the pavement is generally in “marginal” condition and that is currently an appropriate candidate for pavement preservation. The pavement will be 20 years old at the time of the anticipated construction for this project, the pavement joints are cracking, and the overall pavement condition is expected to continue to decline such that repairs and resurfacing are necessary.

Justification: *Public Safety; Condition of Existing Facility; Availability of Outside Funding*

New Ballas Road is the City's largest street and one of two City-maintained streets classified as a minor arterial. Preservation of this street's pavement is a high priority, both for the traveling public and to control future costs. The deteriorating pavement joints, sidewalks, and curbs require a significant investment to correct, and grant assistance for the work will make affording these improvements much more manageable.

Operating Budget Impact:

This project will eliminate pavement patching needs and sidewalk issues that require staff attention.

Comments:

This project is the second of what is expected to be four phases of work along New Ballas Road.

NEW BALLAS IMPROVEMENTS**PHASE 3 - LADUE TO MAGNA CARTA (DESIGN AND STP GRANT)**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$150,000	\$20,000	\$250,000	\$0	\$0

Project Description:

The project includes pavement resurfacing, concrete curb replacement, illuminated street name signs, traffic signal improvements, and accessibility improvements along New Ballas Road from Ladue Road to Magna Carta Drive. Staff plans to apply for federal grant assistance for this project in FY2025. The grant match for this phase includes 100% of the design (FY2026), and 80% of the land acquisition and construction costs. If the grant application is successful, construction is anticipated to occur in FY2028. The full project cost will be included in the appropriate fiscal years if the City successfully obtains a grant for this work.

Existing Conditions:

The asphalt pavement along New Ballas Road is generally in good condition, but many of the concrete sidewalks, curbs, and entrances are in poor condition. Much of the existing sidewalk falls short of the current accessibility standards. North New Ballas Road was found to have an average pavement condition index (PCI) of 53 in 2022, indicating the pavement was generally in “fair” condition at that time. New Ballas Road was last resurfaced in 2008, meaning that it will be more than 20 years old and will need to be resurfaced when project moves to construction.

Justification: *Public Safety; Condition of Existing Facility; Availability of Outside Funding*

New Ballas Road is the City's largest street and one of two City-maintained streets classified as a minor arterial. Preservation of this street's pavement is a high priority, both for the traveling public and to control future costs. The deteriorating sidewalks, curbs, and entrances require a significant investment to correct, and grant assistance for the work will make affording these improvements much more manageable.

Operating Budget Impact:

This project will eliminate pavement patching needs and sidewalk issues that require staff attention.

Comments:

This project is the third of what are expected to be four phases of work along New Ballas Road.

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$0	\$125,000	\$25,000	\$250,000	\$0

Project Description:

The project includes pavement resurfacing, concrete curb and sidewalk replacement, and accessibility improvements along New Ballas Road from Magna Carta Drive to Olive Boulevard. Staff plans to apply for federal grant assistance for this project in FY2026. The grant match for Phase 4 includes 100% of the design costs (FY2027) and 20% of the estimated land acquisition and construction costs. If the grant application is successful, construction is anticipated to occur in FY2029. The full project cost will be included in the appropriate fiscal years if the City is successful in obtaining a grant for the work.

Existing Conditions:

The asphalt pavement is generally in good condition, but many of the concrete sidewalks, curbs, and entrances are in poor condition. The City has improved the accessibility features at the signalized intersections, but improvements remain. This portion of North New Ballas Road was found to have an average pavement condition index (PCI) of 53 in 2022, which indicates that the pavement is generally in “fair” condition and that is currently an appropriate candidate for pavement preservation. The pavement will be more than 20 years old at the time of the anticipated construction for this project. While the pavement is currently in good condition, the age of the pavement and its heavy use are expected to continue to contribute to the pavement’s rapid deterioration during the next 5-7 years.

Justification: *Public Safety; Condition of Existing Facility; Availability of Outside Funding*

New Ballas Road is the City’s largest street and one of two City-maintained streets classified as a minor arterial. Preservation of this street’s pavement is a high priority, both for the traveling public and to control future costs. The deteriorating sidewalks, curbs, and entrances require a significant investment to correct, and grant assistance for the work will make affording these improvements much more manageable.

Operating Budget Impact:

This project will eliminate pavement patching needs and sidewalk issues that require staff attention.

Comments:

This project is the last of what is expected to be four phases of work along New Ballas Road.

LADUE ROAD IMPROVEMENTS (DESIGN & STP GRANT)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$175,000	\$25,000	\$480,000	\$0	\$0	\$0

Project Description:

This project will include pavement resurfacing and sidewalk accessibility improvements along Ladue Road, from Emerson Road to Ladue Estates Drive and would be the first of two phases of work to repave Ladue Road. Staff applied for a federal grant for this project in FY2024. If successful, construction would be in FY2027. The grant match shown above includes 100% of the design costs (FY2025) and 20% of the estimated land acquisition and construction costs. The full project cost will be included in the appropriate fiscal years if the City is successful in obtaining a grant for the work.

Existing Conditions:

Ladue Road's pavement is fifteen years old and is beginning to show its age. Multiple utility projects and failing repairs from the previous paving project have given Ladue Road an uneven ride.

Justification: *Public Safety; Condition of Existing Facility; Availability of Outside Funding*

Ladue Road serves approximately 10,000 vehicles per day and is one of the City's most-traveled streets. Preservation of the Ladue Road pavement should be a high priority for the City. According to the proposed plan, construction of this project would take place when the pavement is 16-17 years old. At that age, Ladue Road will likely need pavement resurfacing.

Operating Budget Impact:

A newer road surface will require few (if any) repairs by the City's staff.

Comments:

None

OLIVE-270 OVERPASS CLEANING & PAINTING

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$20,000	\$200,000	\$0	\$0	\$0	\$0

Project Description:

This project will involve nighttime cleaning and/or repainting of the exterior (i.e., facing Interstate 270) faces of the Olive Boulevard bridge over Interstate 270. Although the bridge is owned by the State of Missouri, the City of Creve Coeur is responsible for the maintenance of the decorative elements that the City added to the bridge. Among those elements are the decorative bridge faces, which have begun to show some wear. Access to these bridge faces will need to be from Interstate 270, so a significant portion of this project will be traffic control to close several lanes of the highway during each night of work.

Existing Conditions:

What appear to be water stains or peeling paint are evident in several locations along both faces of the Olive overpass. The white stains detract from the tan and beige tones of the bridge face.

Justification: *Beautification; Condition of Existing Facility*

The decorative elements of the Olive overpass promote awareness to drivers that they are in Creve Coeur. The decorative elements also promote the City as a beautiful, well-maintained place to work, shop, and live. Stains or peeling paint detract from the positive image of the City as a desirable destination.

Operating Budget Impact:

None

Comments:

None

Expenditure Type	Amount

FERNVIEW SIDEWALK**PHASE 2 GALLAGHER TO LeHAVRE (DESIGN & TAP GRANT)**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$80,000	\$0	\$0	\$0	\$0

Project Description:

The City developed a concept plan to add a sidewalk along Fernview Drive (between Olive Boulevard and Gallagher Road) and along the side streets to connect with the existing sidewalk networks on each side of Fernview. This project would be a continuation of this sidewalk network along Fernview / Bellerive Estates from Gallagher to LeHavre. The result of this project would be a unified collection of subdivision sidewalks that are currently not connected. Funding in FY2026 represents the City's matching funding for design, easement acquisition, and construction for a federal Transportation Alternatives Program (TAP) grant, the application for which could become available in FY2026.

Existing Conditions:

Fernview Drive / Bellerive Estates Drive is a collector roadway that serves several of the residential subdivisions in Ward 4. Sidewalks were constructed throughout most of the subdivisions bordering Fernview and Bellerive Estates, but not along or adjacent to Fernview or Bellerive Estates. The result is a series of sidewalks without connections to each other or to Olive Boulevard.

Justification: *Community Demand; Public Safety; Availability of Outside Funding*

Increasing the walkability of Creve Coeur is a common request from residents and a goal outlined in the City's Strategic Plan. Creating a sidewalk along Fernview that connects to the adjacent existing sidewalks will make progress toward this goal.

Operating Budget Impact:

None

Comments:

The actual cost and schedule for the project will be incorporated into future capital improvement program plans if the City successfully obtains a federal grant for the project.

MASON ROAD PEDESTRIAN SIGNAL

Estimated Annual Costs

Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$25,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The project will include the installation of a solar powered pedestrian signal (rectangular rapid flashing beacons {RRFB}) on Mason Road near the walking path entrance for Millennium Park. With Millennium Park renovations being completed in the spring of 2025, an increase in pedestrians crossing Mason Road at this location is anticipated. Also, construction of the Duever Estates subdivision on the West side of Mason Road near this location has started and an increase of pedestrian activity is anticipated from the new homes. This project will provide a sidewalk link section to the newly construction public sidewalk along the Duever Estates frontage along Mason Road.

Existing Conditions:

Mason Road is a two-lane roadway section at this location with one travel lane in each direction. There are sidewalks generally on both sides of the road. The existing midblock crossing has pavement markings and signage at the roadway edges.

Justification: *Community Demand; Public Safety*

The solar powered RRFB at this location will provide an increase in visibility for pedestrians using this crossing, will enhance safety at this location and will increase the percentage of motorists yielding for pedestrians using the crosswalk.

Operating Budget Impact:

None

Comments:.

None

PUBLIC WORKS CAPITAL EQUIPMENT

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$831,915	\$400,258	\$433,151	\$428,288	\$435,586	\$445,593	TBD

Project Description:

This project is dedicated to replacing older equipment used by the Department of Public Works. Equipment replacement is based on a scheduled rotation that helps limit the financial impact on any one year. The focus will be on replacing equipment that will be about ten years old.

Existing Conditions:

Some Public Works equipment has reached the end of useful and dependable life. Significant maintenance costs can be expected if this equipment is kept in service.

Justification: *Public Safety; Operating Efficiency; Condition of Existing Facility*

Replacement of the equipment noted above is necessary to provide services to the residents and repair the City's infrastructure. Without replacement, it will not only have an effect on public safety, it will also affect the City's operating efficiency due to down time for equipment repairs.

Operating Budget Impact:

Replacement of older equipment helps reduce the overall annual maintenance costs of the Public Works fleet. Using older equipment can result in significant increases in repair bills and increased equipment downtime, which reduce staff's ability to operate efficiently to provide services to the residents.

Comments:

Capital equipment includes equipment costing more than \$20,000 and having a useful life of at least five years. Public Works staff plans to sell the replaced equipment at auction after the new replacement vehicle arrives. The amount of revenue from the auctioned equipment helps to offset the cost of new equipment.

PUBLIC WORKS CAPITAL EQUIPMENT**FY2025 FLEET REPLACEMENT PROJECTIONS**

<u>Equipment to be Purchased</u>	<u>Estimated Cost</u>	<u>Equipment for Trade/Auction</u>
Two-ton Dump Truck with Plow	\$ 174,858.00	2011 Two-ton Dump Truck

PROJECT MANAGEMENT

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$165,081	\$179,006	\$184,400	\$190,000	\$195,700	\$201,600	TBD

Project Description:

This line item includes the costs associated with the full-time salary and benefits for two engineers to help oversee the design and construction of projects outlined in the Capital Improvement Program: One engineer will be 100% funded through the Capital Fund; the second engineer will be 50% funded through the Capital Fund and 50% funded through the Parks and Stormwater Fund.

Existing Conditions:

Engineering staff assists the Director of Public Works with monitoring construction activity, preparing contract documents, performing design surveys, and the overall management of the Capital Improvement Program.

Justification: *Operating Efficiency*

The responsible and effective administration of the City's capital improvement projects, and grant-related projects in particular requires expertise and significant staff time. Projects often have similar schedules, and multiple projects can require immediate attention at the same time. The City's Public Works Administrative staff is too small to consistently accommodate the demands of these projects while also meeting the expectations for the various other services provided by the Department of Public Works.

Operating Budget Impact:

Annual costs for this position include salary and benefits plus ongoing employee training, city equipment, cell phone, and general supplies, which are anticipated to be approximately \$1,000 per year.

PARKS AND STORMWATER FUND

In November 2020, Creve Coeur voters approved a half-cent sales tax, the revenue from which is dedicated to the operations, maintenance, and improvements needed for the City's parks, recreation, and stormwater infrastructure. Most of the City's projected investments into parks and stormwater are proposed to be financed through this fund.

Parks and Stormwater Fund Revenues

The City's Parks and Stormwater Fund has two main funding sources: a half-cent parks and stormwater sales tax and reimbursement from grants and other outside funding. Together, these funding sources are projected to generate approximately \$17.01 million over the FY2025-FY2029 CIP.

Half-Cent Parks and Stormwater Sales Tax. The projected sales tax revenues are approximately \$14.58 million for the FY2025-FY2029 CIP, which averages out to approximately \$2.92 million per year in the plan.

Grants and Outside Funding. There are two primary outside funding sources for parks and stormwater improvements: the Municipal Park Grant and MSD OMCI reimbursement program.

- *Municipal Park Grant.* The City can seek Municipal Park Grant to supplement up to \$525,000 for parks improvements about every year. This funding source will be shared with the Capital Fund and will be identified in the proper fund as projects are identified.
- *MSD OMCI Reimbursement.* The Metropolitan St. Louis Sewer District (MSD) offers a reimbursement program for stormwater-related operations, maintenance, and construction improvements (OMCI) expenses in the Deer Creek watershed, which is generally the area in Creve Coeur east of Interstate 270 and south of Olive Boulevard. In addition, there is also University City MSD OMCI District, which is a relatively small geographic area north of Olive Boulevard and east of North Lindbergh Boulevard. University City OMCI District is the watershed drainage district that generally flows into/through University City, but also flows into other municipalities including Creve Coeur. The City plans to seek approximately \$1.3 million in reimbursement from this program over the five-year CIP.

Parks and Stormwater Fund Expenditures

This sales tax revenue does not have a designated division of how it will be spent, but the City Council can decide to set the allocation amounts or to evaluate the division of funds through each CIP process. The proposed five-year CIP includes the following allocation of the sales tax revenue:

- | | |
|---|-----|
| • Parks Projects | 48% |
| • Stormwater Projects | 31% |
| • Capital Project Administration | 5% |
| • Parks and Stormwater Operations & Maintenance | 16% |

Funding for parks is proposed to be the greatest portion due a backlog of deferred parks maintenance, the improvements envisioned through the Parks and Recreation Master Plan, and the initial stormwater focus on smaller projects and the development of a Stormwater Management Plan.

At this time, the proposed CIP does not include investment into the Dielmann Recreation Complex or the Creve Coeur Golf Course through the Parks-Stormwater Tax Fund. Projects involving this property are included in the Capital Fund.

Summaries of the projected revenues and expenditures for the Parks and Stormwater Fund are included below, and details about the projects and other expenses that are proposed to be financed through this fund can be found in the project summary sheets that follow.

HISTORIC BUILDING REHABILITATION AND PRESERVATION

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$69,030	\$25,000	\$25,000	\$80,000	\$25,000	\$25,000	TBD

Project Description:

This project sets aside annual funding for repairs and improvements to the Lake School House at Lake School Park and to the Tappmeyer House at Millennium Park. In FY2025, the focus will be on repairing interior window sills, interior issue, lighting and removal of the exterior chair lift at Tappmeyer. Future funding years could be combined to allow for a larger project, such as Tappmeyer House exterior painting.

Existing Conditions:

The interior of the Tappmeyer House has a few conditions that need attention in the coming year. They include repairs to the interior wall from water damage, repair and reconditioning of a few interior window sills, repaint of the front porch flooring, lighting needs on 2nd floor, and the removal of the exterior ADA chair lift and repair of the railing as the same location.

Justification: *Condition of Existing Facility; Protection and Conservation*

Like any of the City's buildings and facilities, the Tappmeyer House will need regular routine maintenance and improvements to remain structurally sound and attractive.

Operating Budget Impact:

Improvements to the locally historic buildings will help reduce the maintenance needs and costs for this building.

Comments:

None

PARKING LOT SEALING

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$0	\$25,000	\$0	\$0	\$0

Project Description:

This project involves pavement repairs, crack sealing, seal coat, and restriping lines and arrows for the parking lot at Conway Park.

Existing Conditions:

Most of the asphalt pavement in the parking lot at Conway Park is in good condition, but over time, all paved surfaces begin to crack and the parking lot lines fade. Regular pavement maintenance such as sealing prolongs the life of the paved surface.

Justification: *Condition of Existing Facility; Operating Efficiency; Beautification*

Repairs, crack sealing, and a seal coat for the asphalt pavement combine to provide good preventive maintenance for asphalt pavement, and such preventive maintenance will delay more intense and more costly repairs. Newly painted lines will clearly mark the parking spaces. In addition, the parking lot is one of the first things that most park visitors see, and the sealing and repainting will have an element of park beautification to help make that first impression a good one.

Operating Budget Impact:

Sealing pavement helps prevent the need for maintenance activities such as filling pot holes.

Comments:

None.

PARKING LOT SEALING**CONTINUED**

PARK FURNITURE REPLACEMENT

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$20,000	\$20,000	\$20,000	\$20,000	\$20,000	\$0

Project Description:

This project involves the regular replacement of park furniture that is at the end of its useful life. Replacement will involve benches, trash receptacles, and picnic tables.

Existing Conditions:

The City offers dozens of benches, trash receptacles, and picnic tables. Park furniture is exposed to the elements year-round and over time, paint fades, materials degrade, and the furniture becomes unsightly and perhaps even unsafe. Further, the style of the furniture is inconsistent within the City's park network.

Justification: *Condition of Existing Facility; Operating Efficiency; Beautification*

Sharp edges and other hazards can develop on park furniture during the aging process and from normal wear and tear. Replacing park furniture that is past its useful life keeps the City's parks safer and makes them more inviting, enjoyable, and beautiful.

Operating Budget Impact:

Replacing park furniture decreases the amount of time and effort Parks staff needs to expend on repairs. New furniture will be expected to be virtually maintenance free for the next 5-10 years.

MALCOLM TERRACE PARK TRAIL IMPROVEMENTS

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$25,000	\$0	\$0	\$0	\$0

Project Description:

In FY2022, the wooded trails in Malcolm Terrace Park were re-established as rock trails, trail markers were installed along each trail, protective railings were installed along areas bordering Deer Creek, and trail maps were installed at each entrance to the trail system. This project plans for rock and drainage repairs along these paths in FY2026.

Existing Conditions:

Over a mile of nature trails weave through the woods of Malcolm Terrace Park. These trails are currently in good condition.

Justification: *Community Demand; Operating Efficiency*

One of the goals set out in the City's Strategic Plan was to establish a more options for pedestrians. The Parks and Recreation Master Plan also called for the expansion of the parks trail network. Planned maintenance for the trails will help keep the trails in good condition and in service.

Operating Budget Impact:

Clearing the brush and other growth along the paths has been added to the City's annual parks mowing services contract.

Comments:

None

MALCOLM TERRACE PARK TRAIL IMPROVEMENTS**CONTINUED**

Expenditure Type	Amount

MILLENNIUM PARK IMPROVEMENTS**PHASE 2: TRAILS AND RIDGEMOOR FOREST CONNECTION**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$	\$0	\$0	\$110,000	\$850,000	\$0

Project Description:

This project involves the design and construction for three new pedestrian bridges and a new trail through the woods along the south side of Millennium Park. One of these bridges would create a new connection between Millennium Park and the Ridgemoor Forest subdivision at the north end of Deland Drive. Additionally, this project will involve improvements around the Tappmeyer House.

Existing Conditions:

Informal, dirt trails currently exist where the proposed subdivision connection and wooded trails would be located.

Justification: *Community Demand; Condition of Existing Facility; Coordination*

The most popular improvement that residents requested during the development of the Parks and Recreation Master Plan and the Millennium Park Master Plan was expanded trails in the parks. The proposed project would replace informal, uneven, dirt trails with gravel trails and would replace the informal creek crossings with pedestrian bridges that can provide easy access to the park and its trails.

Operating Budget Impact:

Maintenance of these bridges and trails is expected to be minimal at first, but it may become necessary to routinely trim back the brush along the new trails.

Comments:

None.

MILLENNIUM PARK IMPROVEMENTS**PHASE 2: TRAILS AND RIDGEMOOR FOREST CONNECTION****CONTINUED**

Expenditure Type	Amount
Planning, Design, and Engineering	\$ 90,000
Land Acquisition	\$ 0
Construction	\$ 870,000
Equipment	\$ 0

VENABLE PARK IMPROVEMENTS**PHASE 1: TRAIL, BRIDGE, TENNIS COURTS, & SPLASH PAD**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$214,270	\$2,500,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The exact scope of this project has not yet been determined, but it will include elements from the Parks and Recreation Master Plan, such as the renovation of the restroom building for year-long operation, replacement of the tennis courts with post-tension concrete courts, replacement of pavilion, improved parking, a memorial to Dr. H. Phillip Venable, new furniture, the addition of a splash pad, and improved accessibility.

Existing Conditions:

Several of the facilities at Venable Memorial Park are aging and require updates or replacement. The asphalt tennis courts have been overlaid multiple times and can no longer be reliably repaired, and facilities like the pavilion, asphalt paths, and connector bridge have not been updated in the past ten years.

Justification: *Community Demand; Condition of Existing Facility; Coordination*

The project will coordinate with the recommendations of the Parks and Recreation Master Plan and the preliminary planning efforts for Venable Park. The tennis courts were selected as the first phase of improvements due to their popularity as the central features of Venable Park and due to their age and deteriorated condition. Additionally, bridge access to the park was singled out due to its age and deteriorated condition.

Operating Budget Impact:

New facilities are expected to require less annual maintenance and fewer funds than the existing equipment.

Comments:

None

PLAYGROUND SAFETY SURFACE REPLACEMENT

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$125,000	\$0	\$0	\$200,000	TBD

Project Description:

This project involves the replacement of damaged areas and rejuvenation or replacement of the rubberized safety surface beneath the City's playground at Conway Park FY2026. The project will involve the installation of a safety surface under the playground at Malcolm Terrace Park FY2029, which is currently a wood mulch surface.

Existing Conditions:

The rubberized surfaces beneath the City's playgrounds provide the required protection for children and other users against injury from a fall from the playground or swing set. These surfaces lose their flexibility over time, and generally need to be rehabilitated or replaced within 12-15 years. The safety surface at Conway Park was installed in 2011 and will be about 15 years old in FY2026. Staff will continue to evaluate the surfaces at Conway Park, Millennium Park, and Venable Park and will recommend repairs or replacement to these surfaces accordingly.

Justification: *Condition of Existing Facility; Coordination; Operating Efficiency, Public Safety*

The safety surface at Conway Park playground is nearing the end of its life cycle and will see increased operational cost to maintain safety performance. Keeping the safety surface of the City's playgrounds in good condition is required for the continuing use of the playgrounds and the safety of the playgrounds' users.

Operating Budget Impact:

Installation of a safety surface at Malcolm Terrace Park will reduce annual cost incurred by the Public Works staff to remove and reinstall mulch.

Comments:

The safety surface beneath the primary playground at Millennium Park is scheduled for replacement in FY2024 as part of the Millennium Park Phase 1 project, and the safety surface for the playground at Venable Park was replaced in FY2023.

PLAYGROUND SAFETY SURFACE REPLACEMENT**CONTINUED**

City's Contribution (FY2025- FY2029)	\$ 325,000

MILLENNIUM PARK IMPROVEMENTS**PHASE 3: PARK ENTRANCE & PARKING LOT IMPROVEMENTS**

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$0	\$0	\$70,000	\$400,000	\$0

Project Description:

The Millennium Park Master Plan envisions several reconfiguration and improvements to the park entrance and parking lot. This project would involve the design and construction of parking lot improvements, lighting improvements, reconfiguration and improvement of the park entrance plaza.

Existing Conditions:

Access from the parking lot to the park, as well as, pedestrian connections from BJC hospital is limited. Lighting in the parking lot and in the park is non-existing and does not offer a safe environment or park visitors. The entrance plaza is dated in appearance, offers little room for social gatherings and vegetation limits view into the park.

Justification: *Beautification, Community Demand, Condition of Existing Facility*

This project will coordinate with the recommendations of the Park Master Plan and the preliminary designs for Millennium Park. Improvements to the park entrance will offer improvements to safety to park guest and provide increased accessibility. The park entrance is one of the first things that most park visitors see, and an elegant park entrance will help make a great first impression.

Operating Budget Impact:

The main impact to the operating budget will involve additional electrical cost for lighting and staff effort to maintain the lights.

Comments:

None.

LAKE SCHOOL PARK RENOVATIONS

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$55,710	\$0	\$75,000	\$675,000	\$2,600,000	\$0	\$0

Project Description:

This project involves the design and construction of numerous renovations at Lake School Park. The project plan is to replace the existing tennis courts with post-tensioned concrete courts, construct new pickleball courts, construct a playground area, renovations to restroom facilities and associated work items.

Existing Conditions:

The current tennis courts are nearly 20 years old and are nearing the end of their life expectancy. Existing restroom facilities are likewise 20 years old and in need of updates to allow access year-round by visitors.

Justification: *Condition of Existing Facilities; Community Demand*

One of the primary user requests in the Parks and Recreation Master Plan was to offer year-round restroom facilities in the parks and update of tennis facilities with pickleball. Existing courts will be good candidates for replacement in 5 to 7 years, and will reduce the maintenance associate with older facilities to keep them open for public use.

Operating Budget Impact:

The main impact to the operating budget will involve additional electrical cost for lighting both the tennis and pickleball courts. We will see a reduction in staff maintenance labor hours to address cracking and tennis court related issues.

Comments:

The renovation project is in the concept design phase and public meetings will be held to review concept plans for the project.

39N GREENWAY CONNECTION TO CENTENNIAL TRAIL

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$45,750	\$0	\$300,000	\$0	\$0	\$0	\$0

Project Description:

The Great Rivers Greenway (GRG) is a public agency connecting the St. Louis region with greenways. The concept calls for a 600-mile network of greenways connecting St. Louis City, St. Louis County and St. Charles County. The next phase of this trail network is the Centennial Trail plan, which will connect Forest Park and Creve Coeur Lake Park, coming from Warson Park in Olivette to the east, working its way through the light industrial / 39 North district before moving into unincorporated St Louis County. The money budgeted currently is for the first two or three segments of the 39 North Connector pathway.

The 39 North Connector segments of this project start at Stacy Park on the east side, head north along Warson Road, then west along Olive Blvd, then north along Corporate Square and a connection to the main Centennial Greenway path near Gateway and Research Boulevards. The 39N Connector path is divided into five segments. This project is anticipated to fund the first few segments of the 39N Connector. GRG has indicated that they will participate in a portion of the funding for the 39N Connector path. In addition, the City would likely pursue grant opportunities for construction of the path.

Existing Conditions:

GRG moved forward with preliminary design identified in the 39 North Greenway Plan in 2023 and applied for a CMAQ grant in February of 2024. If this grant application is successful construction of the Centennial Greenway from Warson Road to Baur Blvd. (along Gateway and Research) would likely be constructed in 2028.

Justification: *Community Demand; Coordination; Economic Growth; Protection & Conservation*

GRG has indicated (subject to approval of their board) to fund a significant portion of the cost in planning, design and construction of the 39N Connector path. The project will further support one of the goals set in the City's Strategic Plan to establish more options for pedestrians and provide expansion of the parks trail network. A robust trail network will attract more business to the community and make Creve Coeur a desirable place to live.

Operating Budget Impact:

None

Comments:

VENERABLE PARK MEMORIAL (HDR FOUNDATION GRANT)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$75,000	\$225,000	\$0	\$0	\$0	\$0	\$0

Project Description:

This project involves creating a lasting memorial to honor Dr. Venable. The goal is to have commemorative artwork that will engage visitors in the Venable's story. Through design elements, signage and future programming, this project will help inform visitors about the life and character of Dr. Venable as well as educate generations to come on what he faced in Creve Coeur. The memorial will be woven into the park master plan so it will be part of the overall aesthetics of the park.

Existing Conditions:

The park does not currently have a memorial to honor Dr. Venable or tell of his story.

Justification: *Community Demand; Coordination; Economic Growth; Protection & Conservation*

Community demand for this project has existed for quite some time. In 2019, Dr. Venable's story was brought to light to the Mayor and City Council.

Operating Budget Impact:

None

Comments:

None

MALCOLM TERRACE PARK PAVILION REPLACEMENT

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$0	\$0	\$0	\$75,000	\$0

Project Description:

This project involves the replacement of the pavilion at Malcolm Terrace Park. The pavilion provides shelter to visitors to the park. This upgrade will compliment improvements made in 2022.

Existing Conditions:

In 2021, a concrete base was poured under the pavilion, which improved the structures stability. However; the pavilion roofing and support system are approaching the end of life and are in need of replacement.

Justification: *Condition of existing facility; Beautification*

The existing pavilion, associated concrete footings and flat work is in need of replacement. This replacement will serve to ensure a safe space for park visitors and provide an improvement to the park's aesthetics.

Operating Budget Impact:

None

Comments:

None

MILLENNIUM PARK – PARKING LOT SOLAR LIGHTING

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$25,000	\$0	\$0	\$0	\$0	\$0

Project Description:

This project involves the placement of solar powered street lighting to Millennium Park parking lot. In 2024 the Creve Coeur City Council approved a new “Solar Powered Street Light Cost-Share Program”, which offered residents a more cost-effective way to have street lights installed in neighborhoods. Installation of the lighting in the park will provide residents an opportunity to see the effectiveness of the lights and provide support for the program.

Existing Conditions:

Current lighting at the Millennium Parking lot is non-existent, with only residual lighting available from the nearby BJC rear parking lot.

Justification: *Public Safety; Beautification*

The lack of lighting in the Millennium Parking lot poses some safety issues for visitors to the park, both walking in the lot and driving. The Creve Coeur Police Department is planning on upgrading the camera system in the park and the additional lighting will provide improved security to protect visitors and the park amenities.

Operating Budget Impact:

None

Comments:

None

LAKE DREDGING – CONWAY PARK & GOLF COURSE

(DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$450,000	\$0	\$300,000	\$0	\$0	TBD

Project Description:

Over time, the lakes at Conway Park and the Golf Courses have received a large volume of sediment. As a result, the lakes have become shallower. At Conway Park, the depth of the lake is no longer deep enough for a fountain to be able to properly function. At the Golf Course, sediment buildup contributes to foul smells that distract golfers. At both lakes, additional suspended solids have a negative impact on water quality.

In the design phase, the depth of sediment will be measured, and then the amount of dredging required and the dredging methodology can be determined. Conway Park Lake is planned to be dredged in FY2025, and the Golf Course lakes is planned to be dredged in FY2027. Both project locations may include the installation of a forebay to settle out suspended solids, which will extend the amount of time before the lakes will likely need to be dredged again.

Existing Conditions:

Golfers have reported that the lakes at the Golf Course have a strong, unpleasant odor. Dredging the lakes will remove the organic material that is causing the odors. Currently, each of the lakes has a decreased storage capacity and are less effective at stormwater management.

Justification: *Community Demand; Condition of Existing Facility, Protection & Conservation, Beautification*

Dredging the lakes will improve stormwater management performance by slightly increasing the available storage volume. Dredging Conway Lake to a suitable depth may make it possible to stock the lake with fish. After the lakes are dredged, fountains and aeration systems can be installed, which will help improve water quality and help prevent odors.

Operating Budget Impact:

For the forebay to be effective, deposited sediment will need to be regularly removed. This regular maintenance will help prolong the amount of time until the lakes will need to be dredged again. Delaying the cost of another full dredging effort will be cost-effective in the long-term.

Comments:

None

STORMWATER MANAGEMENT COST-SHARE PROGRAM

(GRANT PROGRAM)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$60,000	\$60,000	\$60,000	\$60,000	\$60,000	\$60,000	TBD

Project Description:

The Stormwater Management Cost-Share Program will help individual homeowners and homeowner associations solve stormwater issues that are unlikely to be addressed by a City-funded project or receive funding from existing programs such as the Deer Creek Watershed Rainscaping Program and the MSD Rainscaping Small Grants Program.

Existing Conditions:

Individual homeowners and homeowner associations have asked the City for assistance in solving stormwater issues. Homeowner associations report delaying maintenance because of high costs. Properly maintaining detention basins helps ensure that the basins are detaining the intended volume; flows are flowing from the basin as designed; and stormwater is being managed more effectively. Some basins receive and manage flows from other neighborhoods and nearby roadways. These basins, in particular, serve the greater public good by reducing flood risks and helping protect streambanks from erosion.

The City's Watershed Management Plan identified more than one hundred possible public projects, and more than fifty reported issues were classified as private homeowner issues. Private issues include yard flooding and erosion. While private issues will not be solved with a publicly-funded solution, the Stormwater Management Cost-Share Program will help these homeowners control stormwater.

Justification: *Community Demand; Public Safety; and Protection & Conservation*

Homeowners and homeowner associations have asked the City for assistance in solving stormwater issues. Managing stormwater helps improve public safety by reducing flood risks. Keeping more water longer onsite keeps stormwater from roadways and neighboring sites and flowing too quickly into streams and creeks. Too much water flowing too quickly into roadways can create driving safety issues. Better controlling the amount and rate at which water enters creeks during the peak of storm events helps prevent erosion.

Operating Budget Impact:

The City has no anticipated ongoing operating budget expenses with this cost-share program.

Comments:

None

STORMWATER MANAGEMENT COST-SHARE PROGRAM**(GRANT PROGRAM)****CONTINUED**

Expenditure Type	Amount

WOODBIDGE MANOR & MASON FOREST DRIVE (DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$115,000	\$75,000	\$0	\$0	\$0	\$0	TBD

Project Description:

Woodbridge Manor and Mason Forest Drive were identified as possible public projects under the City's most recent Watershed Management Plan. With the Prioritization Ranking System, the Watershed Management Plan ranked each possible project by assigning a score based on the severity of the issues, benefits, and estimated costs. Woodbridge Manor and Mason Forest Drive were among the plan's highest scoring possible projects.

Combining two project locations into one project will provide a better opportunity for potential cost-savings in both the engineering design and construction phases.

Woodbridge Manor is experiencing street and structural flooding in part from offsite flows. This project will provide an overland flow path for flows coming from beyond the site and direct the water to an existing onsite detention basin. Mason Forest experiences street, structural, and yard flooding. With this project, a swale will be constructed to direct flows to an existing stormwater inlet that will be modified under this project to improve performance.

Existing Conditions:

Both sites are subject to street, structural, and yard flooding.

Justification: *Community Demand; Public Safety*

The Stormwater Committee is in favor of projects that address structural and roadway flooding being an early priority of the City's Stormwater Program. Prioritization Ranking Scores support this strategy as potential projects with structural and roadway flooding score highly.

Structural and roadway flooding are public safety and public health risks. Addressing these types of issues helps protect the public and reduces the City's risk exposure.

Operating Budget Impact:

This project has no anticipated impact on the City's Operating Budget.

FERNPARK DRIVE & WARRINGTON SQUARE (DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$131,000	\$296,000	\$0	\$0	\$0	\$0	TBD

Project Description:

Fernpark Drive and Warrington Square were identified as possible public projects under the City's most recent Watershed Management Plan. With the Prioritization Ranking System, the Watershed Management Plan ranked each possible project by assigning a score based on the severity of the issues, benefits, and estimated costs. Fernpark Drive and Warrington Square were among the plan's highest scoring possible projects.

Combining two project locations into one project will provide a better opportunity for potential cost-savings in both the engineering design and construction phases.

This project will address basement and yard flooding at Fernpark Drive by constructing a swale, curb, and inlet to direct flows to an existing stormwater inlet. Properties and yards on the south side of Warrington Square are experiencing yard and structural flooding. To alleviate the issues, this project will likely install swales that will take flows to existing stormwater inlets.

Existing Conditions:

Both sites are subject to street, structural, and yard flooding.

Justification: *Community Demand; Public Safety*

The Stormwater Committee is in favor of projects that address structural and roadway flooding being an early priority of the City's Stormwater Program. Prioritization Ranking Scores support this strategy as potential projects with structural and roadway flooding score highly.

Structural flooding is a public safety and public health risk. Addressing this issue will help to improve public health and safety.

Operating Budget Impact:

This project has no anticipated impact on the City's Operating Budget.

BEAVER DRIVE CROSSING

(DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$174,000	\$345,000	\$0	\$0	\$0	TBD

Project Description:

This project will address the public safety risks of the failing existing rusting corrugated metal roadway culvert; protect the creek by repairing rusted gabion rock baskets; and address structural flooding and erosion issues at nearby homes.

When the roadway culvert is replaced, the roadway will be raised to provide additional cover over the culvert pipe. This will improve public safety by improving the strength of the roadway. To alleviate stormwater issues, a storm sewer inlet and pipes, berm, swale, and curbing will be installed.

Existing Conditions:

The existing corrugated metal pipe is rusted and failing. The roadway above the culvert is cracking and the depth of cover over the pipe is less than recommended. Downstream of the culvert, gabion rock baskets are also failing. Homes near the culvert are experiencing structural flooding and erosion.

The roadway culvert is under the only roadway access to the four homes on Beaver Drive. Failure of the roadway would prevent any roadway access to the homes east of the culvert.

Justification: *Public Safety; Condition of Existing Facility; Community Demand; Protection & Conservation*

This project will reduce the risk of a roadway collapse by replacing a failing roadway culvert. Given the deteriorated condition of the culvert and the poor condition of the cover above the pipe, this project will protect the public from harm and reduce the City's risk exposure.

The Stormwater Committee is in favor of projects that address structural and roadway flooding being an early priority of the City's Stormwater Program. Prioritization Ranking Scores support this strategy as potential projects with structural and roadway flooding score highly.

Replacing the failing gabion rock baskets will help stabilize the creek banks, which protects an environmental asset.

Operating Budget Impact:

Roadway culverts should be regularly inspected.

Comments:

None

SONA LANE & BELLINGTON LANE (DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$160,000	\$445,000	\$0	\$0	\$0	TBD

Project Description:

This project will address structural flooding and yard erosion for the homes on the west side of Sona Lane. The project will also work towards solving basement and yard flooding at 252 Bellington Lane.

For the homes on Sona Lane, the project will install berms and swales between the homes on Sona Lane and Bellington Lane. The swales will convey flows to a new stormwater pipe and inlet system that will also be constructed as part of this project. At the home on Bellington Lane, a berm and swale with an underdrain will be installed. This system will carry flows to the street and west of the home.

Combining project locations into one project will provide a better opportunity for potential cost-savings in both the engineering design and construction phases.

Existing Conditions:

Homes along the west side of Sona Lane receive large volumes of flow from the east side of Deaver Lane. Flows are eroding yards and flooding homes.

Justification: *Community Demand; Public Safety*

The Stormwater Committee is in favor of structural and roadway flooding being an early priority of the City's Stormwater Program. Prioritization Ranking Scores support this strategy as potential projects with structural and roadway flooding score highly.

Structural and roadway flooding are public safety and public health risks. Addressing these types of issues helps protect the public and reduces the City's risk exposure.

Operating Budget Impact:

This project has no anticipated impact on the City's Operating Budget. After construction, it is likely that the stormwater conveyance system will be dedicated to MSD.

STORMWATER PROJECTS FROM WATERSHED MANAGEMENT PLAN (DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$	\$	\$885,000	\$810,000	\$600,000	TBD

Project Description:

This project will be used for design and construction costs for projects identified under the City's most recent Watershed Management Plan. With the Prioritization Ranking System, the Watershed Management Plan ranked each possible project by assigning a score based on the severity of the issues, benefits, and estimated costs. To maximize benefits to residents, higher scoring projects will be selected to be funded under this project. Higher scoring projects tend to address more severe stormwater issues such as structural flooding, roadway flooding, or erosion that threatens structures.

Staff anticipates anywhere from two to six projects will be identified. It is anticipated that during FY2026, the project listing for FY2027 will be reviewed/approved by the Stormwater Committee, and then the list will be reviewed/approved by the City Council. The same process will be followed in subsequent years.

Existing Conditions:

The Watershed Management Plan assessed existing conditions and compiled a list of known stormwater issues from resident reports, City records, past Watershed Management Plans, GIS information, existing Hydrology & Hydraulics Federal Emergency Management Agency (FEMA) models, channel condition assessments, and field visits. The data set of known conditions was used to identify possible public projects. In the FY2025—FY2029 CIP, projects with higher Prioritization Ranking Score will likely be programmed before projects with lower scores.

Justification: *Availability of Outside Funding; Community Demand; Public Safety; Condition of Existing Facilities; Protection & Conservation*

Projects with the potential for outside funding may be programmed into the CIP before projects with higher scores but no opportunity for outside funding. Residents and the Stormwater Committee have been supportive of the City undertaking stormwater projects to reduce flooding risks, improve public health and safety, and protect the City's waterways. Structural and roadway flooding issues are public safety and public health risks. Addressing these issues helps protect the public and reduces the City's risk exposure.

Stormwater projects may replace or maintain City infrastructure such as roadway culverts or a bridge. Stormwater projects may reduce the City's environmental impact by helping to improve water quality and protect streambanks from erosion.

Operating Budget Impact:

The project may impact the City's Operating Budget if City assets are installed that will require inspections and maintenance.

VARIOUS PROJECTS – UNIVERSITY CITY OMCI (DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$0	\$160,000	\$0	\$0	\$0	TBD

Project Description:

This project will be used for design and construction costs for a stormwater project in the University City MSD OMCI District, a relatively small geographic area north of Olive Boulevard and east of North Lindbergh Boulevard. The project will be located within the City of Creve Coeur limits. University City OMCI District is the watershed drainage district that generally flows into/through University City, but also flows into other municipalities including Creve Coeur. This OMCI district serves the Upper River Des Peres Watershed. Staff will recommend this project in FY2025 to the Stormwater Committee for review/approval, and then the selected project would be reviewed/approved by the City Council in FY2025.

Existing Conditions:

The Watershed Management Plan did not identify any projects within the University City OMCI District. City staff is investigating options for stormwater projects in the area including improvements to roadway curb and gutters or, perhaps, stormwater best management practices to capture flows from parking lots.

Justification: *Availability of Outside Funding; Community Demand; Condition of Existing Facilities; Protection & Conservation*

This project will be completely funded with MSD OMCI funds.

Residents and the Stormwater Committee have been supportive of the City undertaking stormwater projects to reduce flooding risks, improve public health and safety, and protect the City's waterways.

This project may replace or maintain City infrastructure such as roadway curb and gutters. Stormwater projects may reduce the City's environmental impact by helping to improve water quality and protect streambanks from erosion.

Operating Budget Impact:

The project may impact the City's Operating Budget if City assets are installed that will require inspections and maintenance.

DRAIN REPLACEMENTS – WEST RUE DE LA BANQUE & BELLERIVE MANOR

(DESIGN & CONSTRUCTION)

Estimated Annual Costs						
Prior Years	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$70,000	\$0	\$0	\$0	\$0	TBD

Project Description:

The roadway trench drain near 920 Bellerive Manor Drive is failing. Stormwater inlets near 11939 West Rue De La Banque are also failing. This project will replace the City-owned roadway trench drain and stormwater inlets. Like past trench drain replacement projects, this project will use standard details, and engineering design will likely not be needed.

Existing Conditions:

The roadway trench drain at Bellerive Manor Drive is in becoming unstable. The grates are sinking and the concrete slab approach shows signs of cracking. Similarly, the stormwater inlets along West Rue De La Banque are in need of replacement. The metal inlets are sinking and the surrounding concrete is in poor condition.

Justification: *Condition of Existing Facilities; Public Safety*

The City has an obligation to keep its roadway stormwater assets in good repair. Replacing the roadway trench drain and inlets will improve public safety and make the driving experience of the roadways smoother.

Operating Budget Impact:

The roadway trench drain and inlets will require inspections and maintenance.

GRANT FUNDING CONSULTANT RESEARCH FOR STORMWATER PROJECTS

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$25,000	\$0	\$0	\$0	\$0	TBD

Project Description:

This line item includes the costs associated with hiring a professional consultant to research opportunities for Local, State and Federal grants that might be available to possibly help fund design and/or construction of some of the projects listed in the prioritization list contained in most recent version of the Watershed Management Plan (WMP). It is anticipated that the consultant will be able to identify numerous grants that will assist with funding and ultimately completion of numerous projects detailed in the WMP. In addition, the professional consultant might assist City Staff with making grant application submissions.

Existing Conditions:

The City's Department of Public Works typically manages the research for and submission for grants for roadway and sidewalk projects. With the newly completed WMP, it is anticipated that numerous additional grant opportunities will arise and having a professional consultant research and identify such grants will provide the best opportunity for the City to secure such grants.

Justification: *Operating Efficiency*

The responsible and effective administration of the City's parks and stormwater projects requires significant staff time. Projects often have similar schedules, and multiple projects often require immediate attention at the same time. The professional consultant costs provided for in this item will be important to identify and hopefully secure as many grants as practical for future stormwater improvement projects detailed in the WMP.

Operating Budget Impact:

None

VIDEO INSPECTION BALLAS STORM SEWER (OLIVE TO CONWAY) AND VIDEO OF ROADWAY CULVERTS

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$75,000	\$0	\$0	\$0	\$0	TBD

Project Description:

This line item includes the costs associated with hiring a contractor to perform a video inspection of the entire storm sewer system along New Ballas Road from Conway Road to Olive Boulevard. Currently the City owns and maintains this storm sewer system. This video inspection includes a complete analysis of the interior condition of the storm sewers along with a corresponding report of the condition of the entire system. Once the work is completed, City Staff will meet with MSD with the ultimate goal of having MSD take over ownership and maintenance of the storm sewer system along New Ballas Road.

This item also includes the costs associated with hiring a contractor to perform a video inspection of the critical roadway culvert crossing major roadways throughout the City. Currently the City owns and maintains the majority of these culvert crossings. The video inspection will assist in evaluation for future repairs and/or replacements of roadway culverts that could be in a poor structural condition. The video inspection should allow the City to proactively plan for these improvements moving forward.

Existing Conditions:

None of these storm sewers or roadway culverts have been video inspected in well over a decade. The existing structural conditions of these underground sewers is not known.

Justification: *Operating Efficiency*

Video inspection of the storm sewers on New Ballas Road along with video inspection of the roadway culverts crossing major streets will allow the City to proactively plan, design and budget for repairs and replacements that might be necessary.

Operating Budget Impact:

If MSD accepts the New Ballas Road storm sewer system, there would be a savings since future repairs of this system by the City would not be necessary.

Comments:

None

PARKS CAPITAL EQUIPMENT

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$33,271	\$30,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The Department of Public Works proposes to purchase tractor for operation of the flail mower and various other needs required to maintain the park nature trails and surrounding grounds.

Existing Conditions:

Currently the flail mower is only available to be used with current skid steers are not needed for road work or other associate work. The tractor will be a new addition to the department and will greatly assist in nature trail and park ground maintenance.

Justification: *Condition of Existing Equipment; Operating Efficiency*

The City prides itself on the appearance of its parks, and green spaces of the parks are significant passive amenities. New tractor is needed to adequately and efficiently service these areas.

PROJECT MANAGEMENT

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$160,946	\$173,765	\$179,000	\$184,400	\$190,000	\$195,700	TBD

Project Description:

This line item includes the costs associated with the full-time salary and benefits for two Public Works staff members to help oversee the design and construction of projects outlined in the Capital Improvement Program. A project manager will be 100% funded through the Parks and Stormwater Fund, and a civil engineer will be 50% funded through the Capital Fund and 50% funded through the Parks and Stormwater Fund.

Existing Conditions:

The City's Department of Public Works manages the implementation of most of the Capital Improvement Program, and the Public Works staff needs the capacity to responsibly manage the additional projects and programs made possible by the parks and stormwater sales tax.

Justification: *Operating Efficiency*

The responsible and effective administration of the City's capital improvement projects requires significant staff time. Projects often have similar schedules, and multiple projects often require immediate attention at the same time. The project management and engineering staff provided for in this item will be critical for the parks and stormwater projects to be able to be completed successfully and on time.

Operating Budget Impact:

Annual costs for each position include salary and benefits plus ongoing employee training, city equipment, cell phone, and general supplies, which are anticipated to be approximately \$1,000 per employee per year.

BUILDING PROJECT BOND FUND

In November 2016, Creve Coeur voters approved a ballot measure that authorized the issuance of general obligation bonds of \$10.69 million for the purpose of constructing, furnishing, and equipping a new police station on the existing Government Center property and making safety, security, and accessibility renovations to the existing Government Center.

Building Project Bond Fund Expenses

The expenses for the police building project began in FY2018 and continued through FY2020. This project was completed slightly below budget.

Now that the police building project is complete, the remaining balance of this fund will be allocated to safety, security, and accessibility improvements to the Creve Coeur Government Center and the Police Station. Planning and design for the renovation of the Government Center are identified as a project in the Capital Fund. The renovations of the Government Center are tentatively planned for FY2030 or FY2031. Future Capital Improvement Programs will program the contribution from the Building Project Bond Fund for the Government Center project.

Debt Service

Most of the remaining revenues and expenses for the Building Project Bond Fund involve the debt service for the bonds. The debt service for the Building Project Bond Fund will be paid through a 20-year real estate and personal property tax levy, which is anticipated to sunset in 2037.

The property tax that funds the debt service was reduced by approximately 25% in FY2022 and is proposed to remain at this level through the five-year capital plan.

Summaries of the projected revenues and expenses for the Building Project Bond Fund are included on the next page, and details about the two projects that are proposed to be financed through this fund can be found in the project summary sheets that follow.

FY2025-FY2029 BUILDING PROJECT BOND FUND REVENUES

FY2025-FY2029 BUILDING PROJECT BOND FUND EXPENSES

POLICE PARKING LOT SECURITY FENCE

Estimated Annual Costs						
Prior Year	FY2025	FY2026	FY2027	FY2028	FY2029	Future
\$0	\$210,000	\$0	\$0	\$0	\$0	\$0

Project Description:

The Police Department's vehicle fleet parking lot is located on the east side of the Police Building. Access to this lot is controlled along the driveways with vehicle security barriers, but the lot is otherwise open for pedestrians to enter. This project would construct a fence and automated gates to secure this parking lot.

Existing Conditions:

The parking lot for the City's police vehicles currently limits vehicular access through the use of vehicle security barriers at both entrances to the area. A pedestrian, however, would have only minimal restrictions from entering this parking lot.

Justification: *Public Safety*

The City's police vehicles need to be located in a secure area so that they are most likely to be available to respond to calls for service and emergencies. Although there are not specific CALEA requirements for the proposed fence, there are generally accepted practices in the field of security and emergency management that fencing, barriers, and other "target hardening" methods should be used to protect critical facilities, including police departments, emergency operation centers, and jails – all of which are functions of the Creve Coeur police building.

Operating Budget Impact:

The proposed gates would require electricity to operate, but the additional cost to the City is expected to be negligible.

Comments:

None.

APPENDIX C
COMMUNITY REQUESTS AND STAFF RESPONSES
CAPITAL IMPROVEMENT PROGRAM
FISCAL YEARS 2025-2029

Each request is summarized below, generally in the order that the request was received. Each request and the corresponding response from City staff are attached.

	Page
1. Mike Robinson (148 Royal Manor Court)	2
• <i>Create a City Center area, build a community center and net at golf course.</i>	
2. Melissa Inkley (12958 Ferntop Lane)	3
• <i>Retaining wall and creek repairs along Fernview Drive.</i>	
3. Rasmaa Vissa (no address given)	4
• <i>Request for new sidewalks at two locations in the City.</i>	
4. Carolyn Bower (349 Magna Carta Drive)	5
• <i>Request for nature-based stormwater solutions and new bike lanes.</i>	

Mike Robinson (148 Royal Manor Court)
--

Request

I have three suggestions although one may be more of a zoning issue.

1. Create a city center with mixed use residential and commercial on Ballas Rd from Olive Blvd to something just north of Ladue Rd. Like a downtown Kirkwood or the development off highway 70 and 5th St. at the Streets of St. Charles. Ample parking, all very walkable with shops, restaurants, and residential. Making Creve Coeur more of a destination, especially at night.
2. In addition to or as part of #1, build a community center the includes a gym, basketball courts, meeting rooms, racquetball courts, maybe even an indoor pool like the one in Des Peres.
3. Add proper golf ball deflecting landscaping or netting at the golf course along Golfview on the green condominiums. I own a rental on Sarah Lane and my windows keep getting broken out by golfers!

The first two suggestions are community driven. Creve Coeur means “Broken Heart”, but the city doesn’t seem to have that heart or center like other municipalities. I very much appreciate your consideration.

Staff Response

Thank you for submitting your suggestions. The City does not have any current plans to build a new community center, however we have noted your request and have shared such with Jason Valvero, Director of Recreation.

Your idea regarding creating a “City Center” would most likely occur by individual private redevelopments as they occur. The City reviews all new private development plans/ideas as they arise and all such developments would need to comply with all applicable City, State and Federal requirements.

The golf ball net and/or deflecting landscape on the West side of Hole #8 has been brought to the attention of Jason Valvero. At this time, the City does not anticipate making any improvements in this area.

Melissa Inkley (12958 Ferntop Lane)
--

Request

We saw the request for ideas for the CIP in the recent city newsletter. We would like to request the city to consider improving an open creek bed storm drain area.

There is an area behind our home and about 4 other homes and also under Fernview drive that is eroding very badly. It's a well known problem that was brought up as early as 1999 to the city. My neighbors and I have spoken to the stormwater committee several times about this, as well. I think we are on a "list" to have it addressed, but we don't know when this will be. I assume it's sadly still years away, and we are running out of time. One neighbor has lost about a third of his yard, including a backyard fence. Another neighbor has deep sinkholes and several trees with big roots about to fall into the creek and/or on our homes. We are about to lose our retaining wall. We have also had MSD fill at least 4 sinkholes over the last few years. This area needs to be addressed soon, so I don't know if that's via the CIP plan or the sales tax park/stormwater improvement funds plans, but we wanted to bring it up again.

I know this is an area that is behind individual homeowners, but it does come up against an open common ground area (managed by the city, I believe, and not a subdivision), and also runs under Fernview drive, which is a main street in our Fernwood neighborhood. Thanks for the opportunity to comment.

Staff Response

Thank you for your suggestion. On February 26, 2024, the final draft of the Watershed Master Plan was presented in front the City Council at a workshop meeting. Currently the draft final plan is under the public review comment period, which is anticipated to close in April of 2024. The project you referenced is identified in the prioritization list of projects in this Plan, but the project does not have any definitive date of when design and/or construction could occur.

The stormwater committee will annually or semi-annually review projects on the prioritization list and anticipates making recommendations to the City Council for projects to enter design phase and hopefully ultimately into construction. The City Council reviews and approves which project(s) can begin design phase and ultimately into construction.

Request

My suggestions:

1) To extend the existing sidewalk in areas that is non - existent or broken, from the Bellerive Manor Dr. towards the Bellerive elementary school in Creve Coeur, to enable kids/parents to walk/bike safely to the Bellerive Elementary school. In addition, this sidewalk will also enable early morning walking communities to keep away from traffic and be safe on the sidewalk. This ongoing maintenance of the sidewalk should be partly covered by Creve Coeur and any other parties involved.
(Detail map - Bellerive Manor Rd to Bellerive elementary School via Ambois Dr.)

2) The road from Gallagher Rd/Fern view Dr/Olive Blvd lacks proper sidewalk, this sidewalk could be new construction to connect to Olive Blvd both sides, east towards the Fee Fee Rd and west towards the Mallard Lake to enable cycle/walk/enthusiasts a safe way to healthy lifestyle.
(Detail map - Gallagher Rd, Fernview Dr, Olive Blvd, Creve Coeur Mill Rd)

Staff Response

Thank you for reaching out and sharing your concerns. The City has limited funding to construct new sidewalks, however the City does actively research and apply for applicable grant funding for sidewalk improvement programs on a regular basis. Currently the funding for such grant programs is very limited.

On a very positive note, the City was recently awarded a Transportation Alternative Program (TAP) grant for new sidewalk construction on Fernview Drive from Gallagher Road to Olive Boulevard. The process from preliminary engineering to final engineering design and ultimately to construction of the actual sidewalk does take a considerable amount of time. It is anticipated that construction of this new sidewalk would occur in the summer of 2026.

In addition, the City has a second phase for new sidewalk along Fernview Drive from Gallagher Drive to Le Havre Drive in the planning stages. The City anticipates applying for TAP funding for this project likely in 2025 or 2026. If the City is successful in securing funding for this project, then likely the new sidewalk would be constructed in 2029.

The City has added your request for new sidewalk along Ambois Drive (west of Bellerive Elementary School) to our master list of possible future projects.

Request

1. I would like to see Creve Coeur do what Milwaukee has done with a nature-based solution to deal with stormwater and climate change issues. Creve Coeur is in the Deer Creek watershed, which has led to stormwater runoff and flooded basements in neighborhoods downhill from increased development east of Ballas and south of Olive. In addition, Creve Coeur got 10 inches of rain in one day last year. People have installed costly basement sump pumps but even that will not be enough. Climate change is expected to cause more and stronger rains. I have attached a copy of Milwaukee's plan for how plants can help slow down and absorb storm water runoff on private and public property. Hope this could be used in the future through a City Council ordinance so that the city's public works and capital improvements team could help the city adapt to the expensive damage of flooding worsened by climate change.

2. I would like to see Creve Coeur invest like Clayton, St. Louis and cities around the world in separated bike lanes that are safe enough for 12-year-olds to use. That might mean one lane of Ballas or a Mosley sidewalk as a north-south corridor for bikes. And Ladue, Olive and Conway could be the east-west corridors for bikes. The bike lanes would be asphalt and foot high poles or another separation device would separate the path from traffic lanes. I would be willing to get rid of the grassy median to make room for a bike lane on one side of Ballas. In addition, traffic on Ballas needs to be slowed to 35 mph. I would like to see Creve Coeur Connect its bike lanes to those that lead to Maryland Heights and Olivette as well as south along Deer Creek to Frontenac and the library and west along Ladue to Parkway Northeast Middle School.

3. If the Creve Coeur Golf Course becomes no longer viable, I would like to see much if not all of the property returned to park land with prairie grass, sedges, leaves and no grass to mow and a community garden for people in the condos and apartments. I would like to see the golf paths become walking and biking paths. People who live south of Olive would walk and bike to the grocery stores and restaurants on Olive if the walking/biking infrastructure were in place. Also, it would encourage less use of cars and be better for the climate.

Staff Response

Thank you for all your detailed suggestions. On February 26, 2024, the final draft of the Watershed Master Plan was presented in front the City Council at a workshop meeting. Currently the draft final plan is under the public review comment period, which is anticipated to close in April of 2024. Over the coming years, the City anticipates that possibly some of the solutions you mentioned in point #1 will be implemented.

Additions of bike lanes along the routes you mentioned would be a very costly endeavor. Currently there is no funding allocated for such improvements. For the Golf Course, the City's current position is that this will remain a golf course for the long-term future.
