MISSOURI SERVICE AREASERVICE CLASSIFICATION NO. 5(M)STREET AND OUTDOOR AREA LIGHTING - COMPANY-OWNED (Cont'd.)* 1. RATE APPLICATION

Available for lighting streets, alleys, walkways and other thoroughfares, or for outdoor lighting of public or private areas for security or similar purposes when such lighting facilities are operated and maintained as an extension of Company's distribution system.

* 2. CHARACTER OF SERVICE SUPPLIED

Company shall inventory, furnish, install, maintain and deliver electric service to automatically-controlled lighting fixtures currently offered as standard facilities by Company. Customer shall select the type and size of lamps and fixtures from the standard equipment inventoried and offered by the Company and shall specify the location of said fixtures. Other than service to Company's post-top fixtures, the service provided hereunder shall be supplied by lines or cables through fixtures supported by standard upsweep brackets attached to existing poles; however, certain non-standard facilities may be installed hereunder in accordance with the terms and conditions stated in the following paragraph 3.

* 3. NON-STANDARD FACILITIES

Whenever customer requires Company to install non-standard facilities hereunder (such as longer upsweep brackets, switches, protective barriers, etc.) and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such non-standard installation inadvisable, Company will make such installation provided customer pays in advance to Company all costs in connection therewith. Subsequent replacements of said facilities will be provided by the Company.

4. CONVERSION OR MODIFICATION OF LAMPS

** Where customer requests a conversion or modification of the size or type of lamp currently installed, and Company would not otherwise be converting such lights at that time, Company will make the requested changes, within the parameters described below, provided that customer pays in advance to the Company \$100.00 per lamp for both the removal cost and loss of the remaining life of such lamps and, additionally, signs a new contract at the time when 20 percent or more of the customer's total lamps then installed are so converted or modified. Re: Old Olive Plan – 39 North Innovation District

A major component of the recently-adopted 39 North Innovation District Plan is to re-make Old Olive Street into a vibrant and multi-faceted pedestrian, bike and transit network. This corridor will serve as a critical link between the Danforth Center on the east end of the district, and the retail, restaurants, and residential areas to the west.

The attached intergovernmental agreement with St. Louis County and St. Louis Economic Development Partnership (STLEDP) will provide for the creation of a master plan for Old Olive. The plan will be jointly created by the entities with administration and contract oversight by STLEDP. St. Louis County will contribute up to \$450,000, and the City of Creve Coeur will contribute up to \$50,000 in this collaborative effort.

The Old Olive Plan will provide a detailed road map for future infrastructure improvements along the corridor, and serve as the basis for future grant applications for construction.

A budget adjustment will be necessary, sufficient funds are available in the Capital Improvement Fund for this expenditure.

Sincerely,

Mark Perkins

MEMORANDUM

Date: August 22, 2017
To: Mark Perkins, City Administrator
From: Jason Valvero, Director of Recreation
CC: Lori Obermoeller, Director of Finance
Subject: Olympia Ice Resurfacer

The Recreation Department has money in the FY18 CIP to purchase a new ice resurfacing vehicle to replace the current 2003 unit. The current machine is 14 years old and has 6,106 hours of operation on it (equal to 213,710 miles). It is showing its age and needs in-depth maintenance performed to bring it back to good operating performance. The current 2003 machine will be used as a backup to the new machine.

In July of this year, I was contacted by the Olympia representative, asking if I was interested in buying a previously owned machine from a National Hockey League team. He knew Creve Coeur was in the market for a new machine and thought this would be a great opportunity to get an almost new one for \$74,500. After researching pricing on new and used machines, it was determined this would be a good opportunity for the following reasons:

1. The used machine will be \$74,500 or 25% less than the cost of a new machine at \$98,985.
2. The used machine will still come with a 1-year full warranty on all parts, labor and travel expenses. New machines come with a 2-year warranty.
3. The used machine only has 284 hours of use on it, which is very low for a 2014 model. With our current machine, we are averaging 436 hours per year.
4. The used machine is available at the end of this month, compared to a delivery time of 8 to 12 months for a new one from the factory. Buying a machine now, allows us to maintain our high level of quality ice customers have come to expect, instead of waiting up to a year for a new resurfacer.
5. The machine is located here in St. Louis at Scottrade Center, home of the St. Louis Blues. This will save \$2,000 in shipping and handling fees, as well as saving the City \$1,785 in duty and brokerage fees. We would be faced with these extra costs if we purchase a new machine. The city will contract with a tow truck company to pick up and deliver the machine at a cost of approximately \$300.
6. Research suggests that asking prices for used Olympia resurfacers range from \$25,900 to \$65,000 (model years 2002 to 2008). A few comparisons are included at the end of the memo.

Staff also felt it was necessary to have the machine inspected before considering the recommendation to Council, so on August 16, staff and Mobile Equipment Maintenance (our local service technician) inspected the machine at Scottrade Center. The results of the inspection report were very positive and are as follows:

This machine is in perfect condition.

- Vertical and horizontal auger bearings are tight.
- Conditioner lift arm pins and bearings are tight.
- Conditioner hold down check valve working.
- Open and close timing of dump tank lid is correct.

- Wash water pump is working, impeller wasn't checked.
- Hot and cold water valves are good.
- Board brush and arm are good.
- Front brakes are good.
- Rear brakes are good and caliper brackets are updated with thicker ones.
- Front axle updated to a solid heavy duty axle.
- No hydraulic leaks.
- Trans fluid clean and level is correct.
- Engine oil clean and level is correct.
- Coolant wasn't checked.
- All electrical switches work.
- Emissions light is off, exhaust wasn't tested.
- Small coolant leak on thermostat housing and bypass hose.
- No blade or bolts.

The recommendation is to purchase the used 2014 Olympia Millennium, serial number RM141139560E, from CTM Services Inc. in the amount of \$74,500. The machine would be a sole source purchase and emergency in nature due to the fact this Olympia is available at this time, and will not be available for long. Given the current state of our 2003 model, this purchase will ensure that we are able to properly maintain our ice in the upcoming season. The 1996 Olympia that is the current backup, will be traded in at a fair price of \$5,000.

A total of \$156,000 has been allocated in the CIP budget in Equipment 02-61-71-9516. The \$156,000 amount was the max dollar amount expected to spend if a new electric machine was bid for purchase.
